QUESTION 1

You are meeting with a potential HP Helion customer. You ask whether the company has begun to use any cloud services and, if so, what has and has not been working for them. Which response helps to qualify the customer for an HP Helion solution?

- A. We need flexibility and want to avoid getting locked in to one cloud service provider.
- B. We see no need for IT to provide oversight over public cloud services.
- C. We want to refocus IT on managing infrastructure resources.
- D. We are happy with one cloud service provider and see no need for another provider in the future.

Correct Answer: D

QUESTION 2

Match the HP resources to their descriptions.

Hot Area:

HP Solution Center

Provides an interface containing demonstrations, webinars, and supporting collateral
Provides expert support to test, demonstrate, and benchmark the solution

Provides an interface containing demonstrations, webinars, and supporting collateral
Provides expert support to test, demonstrate, and benchmark the solution
Provides detailed information about supported HP storage product configurations
Provides documentation and access to forums and training

HP Helion OpenStack Community Documentation web

Provides an interface containing demonstrations, webinars, and supporting collateral
Provides expert support to test, demonstrate, and benchmark the solution
Provides detailed information about supported HP storage product configurations
Provides documentation and access to forums and training

Correct Answer:

HP Solution Center

Provides an interface containing demonstrations, webinars, and supporting collateral
Provides expert support to test, demonstrate, and benchmark the solution
Provides detailed information about supported HP storage product configurations
Provides documentation and access to forums and training

HP Solution Demo Portal

Provides an interface containing demonstrations, webinars, and supporting collateral
Provides expert support to test, demonstrate, and benchmark the solution
Provides detailed information about supported HP storage product configurations
Provides documentation and access to forums and training

HP SPOCK

Provides an interface containing demonstrations, webinars, and supporting collateral
Provides expert support to test, demonstrate, and benchmark the solution
Provides detailed information about supported HP storage product configurations
Provides documentation and access to forums and training

HP Helion OpenStack Community Documentation web

Provides an interface containing demonstrations, webinars, and supporting collateral
Provides expert support to test, demonstrate, and benchmark the solution
Provides detailed information about supported HP storage product configurations
Provides documentation and access to forums and training

QUESTION 3

A customer is unable to keep up with their internal IT needs using their traditional IT infrastructure model. They believe that a service-oriented cloud model is the correct way forward, but need to know where to begin. Which HP Service will help them understand the business impact of cloud and develop a strategy?

- A. Cloud HybridWorkload Analysis
- B. Cloud Design Service
- C. Hybrid Delivery Strategy Service
- D. CloudStart Service

Correct Answer: C

QUESTION 4

Match each cloud deployment model with its correct description.

Hot Area:

Hybrid cloud

Services consumed from IT assets owned by the corporation, controlled by its IT organization, and located within its firewall
Services consumed from IT assets owned by and operated by a third party, located outside of the company firewall
Services consumed by a single client that is created and administered by a third party
Services consumed from both the private and public cloud environments

Private cloud

Services consumed from IT assets owned by the corporation, controlled by its IT organization, and located within its firewall
Services consumed from IT assets owned by and operated by a third party, located outside of the company firewall
Services consumed by a single client that is created and administered by a third party
Services consumed from both the private and public cloud environments

Public cloud

Services consumed from IT assets owned by the corporation, controlled by its IT organization, and located within its firewall
Services consumed from IT assets owned by and operated by a third party, located outside of the company firewall
Services consumed by a single client that is created and administered by a third party
Services consumed from both the private and public cloud environments

Correct Answer:

Hybrid cloud

- Services consumed from IT assets owned by the corporation, controlled by its IT organization, and located within its firewall
- Services consumed from IT assets owned by and operated by a third party, located outside of the company firewall
- Services consumed by a single client that is created and administered by a third party
- Services consumed from both the private and public cloud environments

Private cloud

- Services consumed from IT assets owned by the corporation, controlled by its IT organization, and located within its firewall
- Services consumed from IT assets owned by and operated by a third party, located outside of the company firewall
- Services consumed by a single client that is created and administered by a third party
- Services consumed from both the private and public cloud environments

Public cloud

- Services consumed from IT assets owned by the corporation, controlled by its IT organization, and located within its firewall
- Services consumed from IT assets owned by and operated by a third party, located outside of the company firewall
- Services consumed by a single client that is created and administered by a third party
- Services consumed from both the private and public cloud environments

QUESTION 5

A customer experiences sporadic performance peaks within their distributed IT environment. Which characteristic of the HP Helion cloud strategy resolves this problem?

- A. The ability to include a broad range of business applications, all leading hypervisors, and multiple operating systems
- B. Scalability to meet unpredictable business demands
- C. Unified delivery and control of services across both cloud and traditional IT environments
- D. End-to-end security

Correct Answer: C
