QUESTION 3

A customer is planning an implementation of HP Data Protector. The clients will be deployed with installation servers. The customer environment includes Windows, Solaris and Linux operating systems. How many installation servers are required?

- A. 0
- B. 1
- C. 2
- D. 3

Correct Answer: C

Installation Server

The **Installation Server** holds a repository of the Data Protector installation packages for a specific architecture. The Cell Manager is by default also an Installation Server. **At least two Installation Servers are needed for mixed environments:** one for UNIX systems and one for Windows systems.

QUESTION 4

A customer currently performs full backups to disk every week. They want less space to be used for each backup. Which strategy uses the least amount of space?

- A. incremental backups
- B. synthetic full backups
- C. virtual full backups
- D. differential backups

Correct Answer: A

An incremental backup provides a backup of files that have changed or are new since the last incremental backup or full backup <http://support.microsoft.com/kb/136621>

QUESTION 5

Which benefit does zoning provide for a customer who uses multi-hosted tape devices?

- A. increased backup speeds
- B. reduced troubleshooting time
- C. increased compression ratio
- D. reduced response times

Correct Answer: B
