-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

A customer currently performs full backups to disk every week. They want less space to be used for each backup. Which strategy uses the least amount of space?

- A. incremental backups
- B. synthetic full backups
- C. virtual full backups
- D. differential backups

Correct Answer: A

An incremental backup provides a backup of files that have changed or are new since the last incremental backup or full backup <http://support.microsoft.com/kb/136621>

QUESTION 2

An advertising agency stores multiple digital images, video, audio, file shares, and database data that originate from 10 source servers. Backups of the data are written to an HP StoreOnce backup device. The agency is experiencing poor deduplication performance in their backup environment.

What should the agency do to optimize deduplication performance of their backup solution?

- A. Enable software compression and synthetic full backups.
- B. Group libraries/shares with similar data types together for the source servers.
- C. Split virtual libraries across multiple Fibre Channel ports on the network.
- D. Setup a separate library/share for the source servers.

Correct Answer: B

QUESTION 3

An enterprise has HP StoreEver ESL Tape Libraries in their data center. They need to perform regular tapedrive firmware upgrades to meet corporate compliance requirements.

Which HP software can the customer deploy to meet the requirements and perform troubleshooting tasks?

- A. Storage Tape Firmware Utility
- B. StorageWorks Library and Tape Tools
- C. CommandView for Tape Libraries

D. Tape Analyzer Software Solution

Correct Answer: C

QUESTION 4

A large enterprise that backs up critical files to disk needs to reduce the time needed for backup and restore as well as space consumption on the backup media. How can the enterprise achieve maximum savings of disk space and time to backup and restore?

- A. Performs full and incremental backups regularly and store them all on the same media.
- B. Performs virtual full backup of files that are significantly larger than the block size used.
- C. Performs frequent synthetic backups and copy the sources.
- D. Performs frequent synthetic backups and object copies.

Correct Answer: B

QUESTION 5

A System administrator needs to ensure that backup replication is implemented according to the best practices. When the administrator uses a Sizing Tool, which criteria must be identified to meet the replication requirements? (Select two)

- A. number of replicating sites
- B. number of servers in the environment
- C. frequency of each backup
- D. amount of data in each backup
- E. number of D2D systems that are replicating

Correct Answer: DE
