**QUESTION 1**

A company has multiple servers that run Microsoft Windows Server. All the servers have compressed data stored on disk. What should you consider when designing an HP Data Protector backup solution for this environment?

- A. Backup speed is increased because Data Protector backs up Windows disks as disk images.
- B. Backup speed is reduced because Windows reads and writes filesystems to cache.
- C. Backup speed is increased because Data Protector use asynchronous reading on Windows filesystems.
- D. Backup speed is reduced because Windows decompresses the data before sending it across the network.

Correct Answer: D

Compression

If data is compressed on a disk, the Windows operating system first decompresses the data before sending it across the network. This reduces the backup speed and uses CPU resources.

QUESTION 2

What is the customer most likely to experience by using the existing backup strategy?

- A. high bandwidth use
- B. quick restore times
- C. high backup efficiency
- D. decreased media costs

Correct Answer: A

QUESTION 3

Which integration method does DATA Protector use to back up virtual machines in a VMWare environment to resolve performance issues and create consistent backups?

- A. VMware vStorage API for Data Protection (VADP)
- B. HP Virtual Server Environment Integration (VSEI)
- C. VSS Writer for VMware (VSSVM)
- D. HP Integrity Virtual Machines (HPVM)

Correct Answer: A

QUESTION 4

Your customer wants to use HP Data Protector and servers that run Microsoft Windows Server 2012. What provides the communication interface between an application on the host and HP Data Protector?

- A. Volume Shadow Copy Provider
- B. Volume Shadow Copy Service
- C. Volume Shadow Copy Writer
- D. Shadow Copy

Correct Answer: B

QUESTION 5

An enterprise customer is designing a backup for their newly-expanded data center. The company produces a large volume of rich media files and uses document scanning system for long-term data retention. The company needs to reduce the time required to restore their data in the event of a system failure.

Which backup system should the company uses in their design?

- A. HP StoreOnce Backup 4000 series
- B. HP StoreEasy 3000 Gateway
- C. HP StoreEver ESL G3 Tape Library
- D. HP StoreEver 9000 Virtual Library System

Correct Answer: C
