QUESTION 1

A large enterprise customer has asked you about scalability of the storage devices. Data growth at the company has been doubling quarterly. The company\\'s IT department uses backup to disk and needs to reduce total storage usage. Which technologies should you recommended to help this customer achieve these goals? (Select three.)

A. array-based replication

B. thin provisioning

C. network-based replication

D. data tiering

E. deduplication

F. virtualization

Correct Answer: BDE

QUESTION 2

A mid-sized company is experiencing inconsistency and unreliability when trying to protect and restore information across their multiple, remote locations. They also need to keep their critical data encrypted over the network and at their backup location. They are looking for an affordable way to address these issues while reducing their backup storage requirements?

How can HP Remote Backup Services benefit this customer?

A. by producing a real-time copy of every transaction at every location so no data is lost

B. by creating and managing a shared pool of resources that can be accessed on demand over the internet

C. by recovering files or re-creating an entire data set using a file structure that mirrors the company\\'s machines

D. by enabling system recovery over the network within hours, without the need for recovery tapes

Correct Answer: D
