**QUESTION 1**

The IT manager of a company wants their NAS storage system that uses deduplication to be more efficient. Which NAS system meets this requirement?

- A. HP StoreOnce with catalyst
- B. HP 3PAR StoreServ with Thin Provisioning
- C. HP MSA 2040 with snapshot technology
- D. HP StoreEasy with Windows Storage Server

Correct Answer: D

HP X3000 G2 Storage boosts the value of your array or SAN by adding Windows Storage Server-powered, IP-based gateway services to it.

QUESTION 2

A regional market leader in direct financial services runs several call center across the United States and is opening a number of new call center in the near future. The client uses Windows XP on dedicated workstations. The IT infrastructure consists of numerous HP Proliant DL360 G5 and HP Proliant DL360 G6 servers running VMware ESX or SUSE Linux for the database server direct-attached storage and HP Ultrium tape drives. They want to consolidate the infrastructure.

You are meeting with the IT director. Which technical benefits should you emphasize in your presentation of a new solution? (Select two)

- A. faster time-to-market for new services
- B. decreased operational expenditure (OPEX)
- C. decreased rack space and power usage
- D. greater service margin
- E. reduced time-to provision systems

Correct Answer: BE

<http://h20195.www2.hp.com/V2/GetPDF.aspx%2F4AA0-0559ENW.pdf> Simplify your data center; make it more flexible, efficient, and less expensive to operate. Tom Joyce, GM and SVP HP Converged Systems, explains how HP Converged Infrastructure can turn your IT into a business advantage.

QUESTION 3

A company currently has 800 virtual machines with 300 TB data. Seventy percent of the servers are at 85% idle. The customer needs to reduce the overall cost of present and future storage upgrade requirements by at least 25% while reducing power and cooling costs.

What should be done to properly size each tier in an HP StoreServ Adaptive Optimization multi-tier solution?

- A. Establish capacity ratios in SSD and FC tiers to meet baseline performance requirements.
- B. Run the 3PAR System Reporter to ensure sufficient regional density I/O in each tier
- C. Configure maximum IOPS for the NearLine tier to reduce costs by the desired percentage.
- D. Estimate the amount of 1TB licenses required for automatic tier movement.

Correct Answer: A

QUESTION 4

Which HP MSA storage solution provides support for SSD and replication?

- A. HP MSA 1040
- B. HP MSA 2040
- C. HP MSA P2000 G3 Combo controller
- D. HP MSA P2000 G3

Correct Answer: B

QUESTION 5

Scenario Following the merger of two financial companies, management is considering combining the two distinct customer call centers into a single physical location. In addition to the overall call center headcount increasing by 30%, the support for two distinct customer bases presents the potential of having two different desktop PCs on the desk of each call center employee. Instead of correspondingly increasing IT support headcount to manage the single, larger call center and call center infrastructure, management believes they can reduce the required time to support call center operations by 40% if they employ virtual desktop technology.

An initial assessment has identified the need for a centralized storage solution that could support 500 virtual desktops running a variety of applications that can scale quickly to accommodate an expected increase in call center staff. The customer is already an HP Blade System customer using HP Virtual Connect Flex-10.

Some of the additional business criteria identified in customer planning interviews includes:

Use client virtualization for the desktops.

Achieve the highest possible density and performance for the virtual desktops, but keep the virtual desktop storage traffic off the network due to a current, existing limitation of only 1GbE.

Do not use standalone, network-attached storage.

Limit the impact of additional rack space.

Minimize the risk of additional help-desk tickets.

Present multiple solutions, prioritized with a recommendation.

Refer to the scenario.

Select the HP MSA configuration with SAS + SSD drives that will satisfy the customer requirements.

- A. HP MSA 1040, with converged controller and FC sfp
- B. HP MSA 1040, with GbE Ports
- C. HP MSA2040, with converged controller and Ethernet sfp
- D. HP MSA2040, with SAS controller

Correct Answer: D
