-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

The Hospital has three locations, each with approximately 300 beds. The Hospital is constantly investing in new medical imaging systems that heavily impact the IT structure. The Hospital's chief technology officer (CTO) is implementing a new high tech imaging system and adding it to the existing storage infrastructure. Change will allow for petabytes of extra storage in the future. The current imaging systems are using an HP StoreAll 9320 storage solution. The CIO wants to expand the existing HP StoreAll system to support the new imaging system.

Which options achieve this goal?

- A. Leave the HP StoreAll 9320 based system at HP StoreAll OF 6.3 and then expand the system with multiple 8800 couplets
- B. Upgrade the HP StoreAll 9320 to an HP StoreAll 9730 and then expand the system with multiple 8800 couplets
- C. Upgrade the HP StoreAll 9320 system to an HP StoreAll 8200
- D. Upgrade to HP StoreAll OS 6.5 and then expand the HP StoreAll based 9320 based system with multiple 8800 couplets

Correct Answer: B

---

**QUESTION 2**

The customer wants to implement an HP StoreOnce solution for the environment show. You have been given the following information:

Each branch office has approximately 100 GB of data.

Philadelphia has approximately 2 TB data.

Pittsburg has approximately 1 TB data.

All backup data will be replicated back to the data center in Pittsburg.

Costs should be kept to a minimum but allow for the possibility of adding three more sites. Which HP StoreOnce solution should you propose for pittsburg?

- A. HP StoreOnce B6200 Backup
- B. HP StoreOnce 4220 Backup
- C. HP StoreOnce 4420 Backup
- D. HP Storeonce 2620 Backup

Correct Answer: B

Replication Licensing:

HP delivers replication by license, either as a standalone replication solution, or as part of the HP StoreOnce Catalyst licensing (see the following section below). With HP StoreOnce Backup, replication is licensed by VTL/NAS target, this means that with one replication license:

1 source appliance can replicate to a single HP StoreOnce VSA\* 8 source appliances can replicate to a single HP StoreOnce 2620 24 source appliances can replicate to a single HP StoreOnce 4210 or 4220 50 source appliances can replicate to a single HP StoreOnce 4420 or 4430 96 source appliances can replicate to a single HP StoreOnce B6200 48 TB target [http://h18004.www1.hp.com/products/quickspecs/14450\\_div/14450\\_div.pdf](http://h18004.www1.hp.com/products/quickspecs/14450_div/14450_div.pdf)

In this time you have 8 source appliances can replication and future you need adding three more sites. (8 + 3= 11 minimum source)

---

### QUESTION 3

A company hosts several Microsoft SQL server instances and virtual machines for their internal sales departments on HP EVA6400 storage systems running View 10.0 and XCS 9.53400. The acts globally and runs a 24x7 business with limited IT staff. The customer requires a solution design focused on a short ROI and an optimal total cost of ownership (TCO) for 5 years. The new storage solution should support the customer's flexible business demands.

What has to be considered when planning the data online migration from the EVA systems within the first 5 months after implementing an HP 3PAR StoreServ system?

- A. Exclusive data access for the HP 3PAR system is required during the migration period
- B. Command View has to be upgraded
- C. HP Service has to be involved
- D. Peer Motion has to purchased

Correct Answer: D

HP 3PAR Peer Motion Software enables Storage Federation and is the first non-disruptive, do-it-yourself data migration and load balancing tool for enterprise storage. With Peer Motion, HP 3PAR StoreServ customers can load balance I/O workloads across systems at will, perform technology refresh seamlessly, cost-optimize asset lifecycle management, and lower technology refresh capital expenditure

---

### QUESTION 4

A medium-sized company with 300 users has a Fibre Channel-based storage infrastructure with two HP StoreServ 7000 storage arrays. Their user data is distributed on three HP ProLiant DL380 G5 servers with local-attached storage. They have asked for a solution to increase the availability of their File Service that will fit into their limited IT budget Which solution you recommend in your proposal?

- A. HP VirtualSystem for Microsoft
- B. HP StoreEasy 3830 Gateway Storage
- C. HP StoreVirtual VSA
- D. HP StoreAll 9300 Storage

Correct Answer: C

HP StoreVirtual VSA <http://www8.hp.com/pt/pt/products/data-storage/data-storage-products.html?compURI=1225885#.Upuy4NK8D6A>

HP StoreAll 9300 Storage <http://h20195.www2.hp.com/V2/GetPDF.aspx%2F4AA2-9975ENW.pdf>

HP Virtual System for Microsoft <http://h17007.www1.hp.com/us/en/converged-infrastructure/converged-systems/virtualization-virtualsystemmicrosoft.aspx#n298OHITGxs>

HP StoreEasy 3830 Gateway Storage <http://www8.hp.com/pt/pt/products/file-object-storage/product-detail.html?oid=5335920#!tab=features>

File Service that will fit in their limited IT budget <http://h20195.www2.hp.com/V2/GetPDF.aspx%2F4AA2-5104ENW.pdf>

## HP StoreVirtual VSA software

### Technical specifications

<b>Hardware support</b>	Runs on all HP ProLiant or third-party servers and c-Class server blades certified with VMware ESX or Microsoft Hyper-V
<b>Warranty standard statement</b>	3-year HP software support standard; 9x5 business hours phone support (software technical support and software product and documentation updates)
<b>QuickSpecs</b>	<a href="http://h18000.www1.hp.com/products/quickspecs/13255_div/13255_div.pdf">h18000.www1.hp.com/products/quickspecs/13255_div/13255_div.pdf</a>

The total package--solution value statements

Gain the benefits of a SAN without requiring a physical SAN infrastructure as StoreVirtual VSA turns hypervisor attached storage into a virtual iSCSI storage. Take advantage of advanced hypervisor features such as VMware vMotion and Microsoft Live

Migration, which require shared storage.

Enables a disaster recovery solution for remote or branch offices that do not have budget, space, or power for a traditional SAN.

### QUESTION 5

A company is running their parts inventory applications on an HP 3PAR F400 storage system with NearLine (SATA) disk drives. These applications are currently using LUN utilizing a Raid 5 (7+1) NL CPG. They are having performance issues while compiling their monthly reports in a timely manner. HP 3PAR System Reporter indicates several high write I/O volumes during production runs.

What should the design team recommend to improve this performance?

- A. HP 3PAR Adaptive Optimization and a new RID 1 CPG
- B. snapshot to capture all writes to a RAID 1 CPG
- C. thin provisioning to achieve a better distribution across all physical disks
- D. HP 3PAR Dynamic Optimization to move the high performance volumes to a new RAID 1 CPG

Correct Answer: D

<http://www8.hp.com/h20195/v2/GetDocument.aspx?docname=4AA4-4524ENW>, page 12 ?Allows for large-scale performance optimization after adding new resources to the system or moving a large number of volumes between tiers
