-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Customer has made the decision to expand their SAN. The customer does not want to merge the existing SAN with the new SAN, but does want the two SANs to interoperate. The customer wants a no-cost management tool that will work with the new SAN switches and their existing HBAs.

Which HP SAN switch should you recommend to the customer?

- A. HP SN3000B Fibre Channel Switch
- B. HP 1606 Extension SAN Switch
- C. HP SN8000C Director Switch
- D. HP SN6000 Stackable Fibre Channel Switch

Correct Answer: D

QUESTION 2

Which activity should be done last during the fulfillment of an HP Installation and Startup Service?

- A. infrastructure functionality test
- B. customer orientation session
- C. documentation preparation
- D. Call Home Software (ISEE) installation

Correct Answer: B

QUESTION 3

What can prevent oversubscription in a SAN?

- A. use shorter distance cables
- B. limit the number of ISLs
- C. add more ISLs
- D. add more devices

Correct Answer: C

QUESTION 4

A broadcasting company has an aged Fibre Channel-based storage networking infrastructure. They have three EMC

CX-series arrays, each with 50 TB, two HP EVA 8100, each with 80 TB. They want to update their environments with two new HP 3PAR StoreServ 7400 arrays. Due to their availability requirements, complexity, and the need to avoid downtime for applications, the company would like to implement online migration using only proposal.

Which solution should you recommend to the customer?

- A. HP MPX200 Multifunction Router
- B. HP Continuous Access EVA Data Migration
- C. HP 3PAR StoreServ External Storage Option
- D. HP 3PAR StoreServ 7400 peer Motion Online Import

Correct Answer: A

QUESTION 5

Scenario

Following the merger of two financial companies, management is considering combining the two distinct customer call centers into a single physical location. In addition to the overall call center headcount increasing by 30%, the support for

two distinct customer bases presents the potential of having two different desktop PCs on the desk of each call center employee. Instead of correspondingly increasing IT support headcount to manage the single, larger call center and call center infrastructure, management believes they can reduce the required time to support call center operations by 40% if they employ virtual desktop technology.

An initial assessment has identified the need for a centralized storage solution that could support 500 virtual desktops running a variety of applications that can scale quickly to accommodate an expected increase in call center staff. The

customer is already an HP Blade System customer using HP Virtual Connect Flex-10.

Some of the additional business criteria identified in customer planning interviews includes:

Use client virtualization for the desktops.

Achieve the highest possible density and performance for the virtual desktops, but keep the virtual desktop storage traffic off the network due to a current, existing limitation of only 1GbE.

Do not use standalone, network-attached storage.

Limit the impact of additional rack space.

Minimize the risk of additional help-desk tickets.

Present multiple solutions, prioritized with a recommendation.

Refer to the scenario.

You suggest VMware View as a solution component to solve some of the customer business challenges. Which step should you take next to ensure that the solution meets HP best practices for VMware View?

- A. Validate compatibility using HP Single Point of Connectivity Knowledge(SPOCK).
- B. Validate configuration using the HP SAN Design Reference Guide.
- C. Create the HP Virtualization Bundle configuration in SalesBUILDER for Windows to validate connectivity.
- D. Compare the design to the HP Client Virtualization Enterprise Reference Architecture.

Correct Answer: D
