-  **800,000+** Satisfied Customers

**QUESTION 1**

A customer is planning to migrate data from an HP 3PAR F-200 to an HP 3PAR StoreServ 7000 Storage System. What should the customer use to migrate the data?

- A. Peer Motion
- B. Recovery Manager
- C. Online Import
- D. Remote Copy

Correct Answer: A

HP 3PAR Peer Motion Software is the first non-disruptive, do-it-yourself data migration tool for enterprise block storage. With Peer Motion, HP 3PAR Storage System customers can load balance I/O workloads across systems at will, perform technology refresh seamlessly, cost-optimize asset lifecycle management, and lower technology refresh capital expenditure.

Unlike traditional block migration approaches, Peer Motion enables customers to migrate storage volumes between any HP 3PAR Storage Systems online, non-disruptively, and without complex planning or dependency on extra tools. Peer Motion leverages HP 3PAR Thin Built In™ technology to power the simple and rapid inline conversion of inefficient, "fat" volumes on source arrays to more efficient, higher-utilization "thin" volumes on the destination 3PAR Storage System.

Peer Motion Manager is an add-on application that orchestrates all stages of the data migration lifecycle to ensure data migration is simple and fool-proof.

QUESTION 2

A customer provides their requirements for a storage solution.

A consultant, using his experience and product knowledge, has designed a solution.

He needs to verify that the storage design and licensing rules have been adhered to, and that the solution can be supported by HP. Which resource can provide this information?

- A. HP StorageWorks Sizing Tool
- B. HP ActiveAnswers
- C. HP Storage Solutions Design Guide
- D. HP SAN Design Validator

Correct Answer: A

It is recommended that the HP StorageWorks Sizing Tool (<http://www.hp.com/go/storageworks/sizer>) is used to identify the product and WAN link requirements because the required bandwidth is complex.

**QUESTION 3**

A customer needs to be able to recover their data in the event of a site failure. They have a strict recovery point objective for their business-critical applications.

Which technique should the customer use?

- A. snapshots
- B. backups to tape
- C. backups to disk
- D. remote replication

Correct Answer: D

Need replication to get the data to a backup site.

Note:

* Recovery Point Objective (RPO) refers to the required point-in-time to which a DR solution can restore the state of data for a particular service, for example, how much data loss is acceptable following a disaster. These requirements can range from "close to zero" data loss (for high-value financial transactions, for example) to some small number of minutes of the most recent data, to loss of the past 1-2 days of data, depending on the criticality of the data to the enterprise.

QUESTION 4

A customer plans to migrate data from a third-party storage system to an HP 3PAR StoreServ 7200 Storage System.

The new storage system must provide up to 128 disk drives.

How many additional drive chassis does the customer need?

- A. Three
- B. Four
- C. Five
- D. Six

Correct Answer: B

QUESTION 5

A customer is planning to migrate from an HP EVA to an HP 3PAR StoreServ 7000 Storage System. The customer uses disk groups on the EVA for fine-grained database management.

What can the customer use to achieve fine-grained database management on the HP 3PAR StoreServ 7000?

- A. logical volumes

B. common provisioning groups

C. disk groups

D. virtual volumes

Correct Answer: B

Terminology comparison between EVA and HP 3PAR StoreServ EVA P6000: Disk Group HP 3PAR StoreServ:
Common Provisioning Group (CPG)
