QUESTION 1

A medium-sized warehouse company has built their Windows-based IT environment over time. They have recently virtualized their servers using VMware technologies. They want to build a centralized storage solution but without a new storage network. Your solution is based on the HP StoreEasy product.

Which common features meet the customer requirements? (Select two)

A. StoreEasy Management

B. 16 Petabyte namespace

C. SAN gateway facility

D. node-based flexibility

E. NFS 4.1 protocol support

Correct Answer: AC

QUESTION 2

The CIO of a company with a business-critical data center wants to allow business units to create virtual servers and assign storage to meet charging requirements. Which product provides non- technical users with a self-service portal to create Infrastructure as a Service (IaaS)?

A. HP Intelligent Management Center

B. HP Matrix Operating Environment

C. HP FlexFabric

D. HP Virtual Connect Enterprise Manager

Correct Answer: B

QUESTION 3

You have designed an environment based on HP BladeSystem enclosures equipped with Virtual connect Ethernet and Virtual Connect Fibre Channel modules. The customer has a restricted budget and while they understand the benefits of the Virtual Connect Fibre Channel module, they ask you to use Ethernet switches instead of the Virtual Connect Ethernet modules.

How should you respond to the customer request?

A. The Virtual Connect Ethernet module is not needed, but you have to use HP 6120XG Blade Switch instead.

B. The Virtual Connect Ethernet module is not needed but you have to use HP 6125G Ethernet Blade Switch instead.

C. The Virtual Connect Ethernet module is needed and you always have to use the Fibre Channel and Ethernet Virtual Connect modules in pairs.

D. The Virtual Connect Ethernet module is required to set up the Virtual Connect environment.

Correct Answer: D

QUESTION 4

When planning an HP StoreOnce VSA solution, which component can significantly impact backup and restore performance?

A. Datastore layout

B. Number and type of disk

C. Supervisor type

D. Replication link bandwidth

Correct Answer: D

QUESTION 5

Scenario: The consultant is reviewing a customer\\'s storage and backup infrastructure design for a possible upgrade new solution design. The existing environment consists of several HP DL servers connected to HP 24 SAN Switches. An HP Enterprise Virtual Array 4400 is used as storage for their virtualized servers. Some HP D2700 Storage Systems are direct connected to their Windows servers. An HP StoreOnce D2D 4106fc Backup System is used as primary backup target. Once a week backup data copied to an HP MSL4048 as secondary backup target using HP Data Protector (DP) 6.1, During the planning phase the consultant has to propose whether the existing solution can be upgraded or a new solution design is required.

Refer to the scenario:

Upgrading the backup application and the primary backup system to the latest software version would provide which advantage?

A. Federated Deduplication can be implemented using HP StoreOnce Catalyst.

B. A Media Agent can be installed on the HPStoreOnce Backup System using the HP DPStoreOnce client.

C. Tape offload can be performed using direct-attached tape drives and the Data Protector echo copy functionality.

D. The new HP Data Protector VTL license model can be applied.

Correct Answer: A
