**QUESTION 1**

What happens when an HP ALM project administrator saves a customization change as a Major Change rather than a Minor Change?

- A. The customization loads when the session expires and the user reconnects.
- B. The customization loads after the ALM server is restarted.
- C. The customization is added to the parent project template.
- D. The customization loads when the user changes screens in ALM.

Correct Answer: A

---

**QUESTION 2**

The Traceability Matrix enables you to determine the extent of which relationships? (Select two)

- A. Test set to test set
- B. Requirement to requirement
- C. Requirement to test
- D. Cycle to release
- E. Requirement to release

Correct Answer: CD

---

**QUESTION 3**

What happens if you link a defect to a run? (Select two)

- A. The defect is indirectly linked to the run's steps because the run steps are lower-level.
- B. The defect is directly linked to the run and indirectly linked to the run's test instance, the test set, and the test.
- C. The defect is indirectly linked to the test instance and to the test set, but not to the test, because the link to the test instance prevails.
- D. The defect is indirectly linked to the test instance only, as indirect links only propagate to the nearest entity.
- E. If the corresponding test is covered by a requirement, an indirect link is also added to the requirement.

Correct Answer: AC

---

#### QUESTION 4

What is the Project Repository in HP ALM?

- A. It is a portion of the file system that stores all files to be used by all the projects in the system.
- B. It is a configuration file that stores information about all projects available to HP ALM users. An entry exists in this file for each project you create.
- C. It is a database schema that stores project information, such as entity data and user data. A separate schema exists for every project you create.
- D. It is the set of rows identifying the HP ALM projects in the Site Administration schema. A row exists in this schema for each project you create.

Correct Answer: D

---

#### QUESTION 5

Which entities can you add to a Library? (Select three)

- A. Test Sets
- B. Defects
- C. Business Model
- D. Resources
- E. Requirements
- F. Tests

Correct Answer: ACE
