**QUESTION 1**

When is correlation used?

- A. when a recorded script includes a dynamic value (such as a session ID) and cannot replay
- B. when you want to take a value and turn it into a variable in order to make your script more realistic
- C. when you want to input different users\' credentials in your script
- D. when you want to check the presence of a string in a response to validate script results

Correct Answer: A

---

**QUESTION 2**

You encounter a situation where the applications communicate via Web Services server-to-server. Both servers are running on Linux. What is the best way to simulate the load on the second server?

- A. Launch VuGen on the first server and record the process using SOA Protocol.
- B. Get the code of the application and create a Java web service call to the second server.
- C. Record two scripts and merge them.
- D. Use tcpdump and capture the communication, and import using Analyze Traffic.

Correct Answer: D

---

**QUESTION 3**

Click the Task button. Match each output tool with its description.

Select and Place:

Match each output tool with its description.

Output Tools	Descriptions
(place here)	displays the script overall status when the script execution is complete
(place here)	lists communications between the script and the server when the script execution is complete
(place here)	summarizes the success or the failure of each step of the playback web script
(place here)	creates results in a format suitable for exporting to a third party with no access to LoadRunner tools

Output Tools

HTML Test Result

Replay Log

Test Results Window

Replay Summary

Done

Correct Answer:

Match each output tool with its description.

Output Tools	Descriptions
HTML Test Result	displays the script overall status when the script execution is complete
Test Results Window	lists communications between the script and the server when the script execution is complete
Replay Log	summarizes the success or the failure of each step of the playback web script
Replay Summary	creates results in a format suitable for exporting to a third party with no access to LoadRunner tools

Output Tools

Done

**QUESTION 4**

What is the unit of measurement for a transaction?

- A. microseconds
- B. milliseconds
- C. seconds
- D. minutes

Correct Answer: C

**QUESTION 5**

You add the logic `lr_message("the message");` to your script but you do not see any messages in the Output window while running the scenario in the Controller. What should you do?

- A. Add the code `lr_start_messages(1);` before the `lr_message("the message");`

B. Change the logging options in the Controller's Run-time Settings from "only when an error occurs" to "Always Send" and "Standard Log."

C. Add the code `lr_set_debug_message(LR_MSG_CLASS_EXTENDED_LOG | LR_MSG_CLASS_FULL_TRACE, LR_SWITCH_ON);` to the line before the `lr_message("the message");`

D. Highlight the script in the Controller, click Details, and click Refresh Log Options.

E. Because only 10% of the messages are logged, wait for the test to run longer.

Correct Answer: B
