**QUESTION 1**

You are tasked with building a Web script. Upon replay, one URL sometimes throws a 404 error that results in the script execution stopping. You want to continue running the script when this 404 occurs because it is not critical to the test. Which command allows you to ignore this failure and continue the script execution?

- A. `lr_continue_on_failure(1);`
- B. `lr_failure_continue(1);`
- C. `lr_continue_on_error(1);`
- D. `lr_error_continue(1);`

Correct Answer: C

QUESTION 2

When choosing between HTML-based and URL-based recording modes for Web protocol, robustness and maintainability of the recorded script should be considered. What would cause the replay failure of a script recorded in URL mode?

- A. a dynamically generated URL
- B. a page with variable content
- C. a form with parameterized data
- D. an image with variable content
- E. an extra resource in the page
- F. a new image referred by the page
- G. the replacement of a JPG image with a corresponding GIF

Correct Answer: G

QUESTION 3

Click the Task button. Match each output tool with its description.

Select and Place:

Match each output tool with its description.

Output Tools	Descriptions
(place here)	displays the script overall status when the script execution is complete
(place here)	lists communications between the script and the server when the script execution is complete
(place here)	summarizes the success or the failure of each step of the playback web script
(place here)	creates results in a format suitable for exporting to a third party with no access to LoadRunner tools

Output Tools

HTML Test Result

Replay Log

Test Results Window

Replay Summary

Done

Correct Answer:

Match each output tool with its description.

Output Tools	Descriptions
HTML Test Result	displays the script overall status when the script execution is complete
Test Results Window	lists communications between the script and the server when the script execution is complete
Replay Log	summarizes the success or the failure of each step of the playback web script
Replay Summary	creates results in a format suitable for exporting to a third party with no access to LoadRunner tools

Output Tools

Done

QUESTION 4

Consider a business process with login, business logic and logout. Login and logout need to be iterated only once while business logic will be iterated many times. What is the correct way to record in terms of actions in the script?

- A. record the entire business process in action
- B. record the entire business process in vuser_init
- C. record login logic in vuser_init, business logic in action, logout logic in vuser_end
- D. record the entire business process in vuser_end

Correct Answer: C

QUESTION 5

What is the purpose of capturing think times?

- A. It simulates the keyboard entry time of an end user on a system.
- B. It is necessary to make VuGen pause long enough to capture the server responses.
- C. It prevents excessive CPU consumption for virtual users on the load generators.
- D. It is necessary to make VuGen pause to reduce the amount of data required during testing.

Correct Answer: A
