**QUESTION 1**

A Microsoft Windows customer wants to add a file server presence to several existing and future remote sites. Redundancy, ease of management and hot swap storage growth capabilities beyond 32TB are required.

The solution must support iSCSI, FTP, and WebDAV for each site. Footprint and cost are concerns. What is the best solution?

- A. X5000 running Windows Storage Server, D2700 enclosure
- B. Four SL230p Gen8 nodes running Windows 2008 R2, SL6500 and ILO advanced licensing
- C. Two DL360p Gen8 servers running Windows Storage Server and a D2600 enclosure
- D. C7000, four BL460c Gen8 blades running Windows 2008 x64 and an MDS600

Correct Answer: A

HP X5000 G2 Network Storage System At a Glance: Comprehensive, highly available Network Attached Storage appliance Two node, active/active mid-range NAS cluster and shared storage in a single system File and block storage capable - CIFS/SMB, NFS, iSCSI, HTTP, FTP, and WebDAV Advanced storage management features - File deduplication, File Classification Infrastructure, Hosted BranchCache, file screening, storage quotas, and storage reporting All inclusive software license Simple deployment and management All standard hardware and software pre-installed in system Power On to file serving in less than an hour 100% compatible with Windows IT infrastructure - Active Directory, Distributed File System (namespace and replication), Microsoft System Center and more Can be remotely managed for lights out data center or remote office locations Scalable and affordable Capable of supporting 10,000 plus users on a single system - dependent on storage configuration, LUN and RAID settings. User testing performed with Microsoft's File Server Capacity Tool. Up to 48TB of capacity inside the system, expands to over 100TB externally with HP D2000 Disk Enclosures File Deduplication feature can recover up to 40% of disk space File Classification Infrastructure feature provides insight into your data to help you manage it more effectively, reduce costs and mitigate risks based on the data's business value No need to buy additional hardware for anti-virus screening any Windows Server 2008 R2 compatible antivirus software runs right on the system Built on Windows Server 2008 R2 File Services Enables administrators to provide faster access to files while minimizing the effort required managing distributed data.

QUESTION 2

You want to create a service template using I/O Designer that will be deployed to the Hyper-V host. Currently, only VMware templates have been used in this environment. How must you prepare a virtual machine template to use for this template?

- A. Use the Insight Control Server migration functionality to migrate the VM from VMware to Hyper-V and then use the vCenter server to prepare the template recognized by I/O.
- B. You can use VMware templates for Hyper-V deployment since I/O is virtualization layer independent.
- C. Use the I/O converter tool to convert the VMware template to change it to the correct format.
- D. Create a virtual machine template using Insight Control virtual machine management functionality.

Correct Answer: D

QUESTION 3

Which comprehensive tool can be used to verify and update software and firmware on a ProLiant server?

- A. Software System Updates
- B. Service Pack for ProLiant
- C. HP System Management Homepage
- D. HP ILO Management Engine

Correct Answer: B

<http://h18004.www1.hp.com/products/servers/management/spp/index.html>

HP Service Pack for ProLiant is an integrated systems software and firmware solution offered across a broad portfolio of many generations of supported HP ProLiant SL/ML/DL/BL 300, 500, 700, and 900 series servers and HP BladeSystem infrastructure.

QUESTION 4

VMware HA has a prerequisite that includes the ability to power on a virtual machine from all hosts within the cluster. This means all hosts have to access to which common resource?

- A. VMware HA agent
- B. vCenter server
- C. Redundant heartbeat network
- D. Shared storage

Correct Answer: D

QUESTION 5

Which default type of custom tool you can create in HP SIM? (Select two)

- A. Scripted
- B. Collection
- C. Web page
- D. Deployment
- E. Remote

Correct Answer: CE

New Custom Tool

Creates a new custom tool that runs on the central management server or on target systems. Maximize ?

Step 1: Select the tool to create

- Remote tool** - A tool that runs on the selected target system(s). It might copy files to the target system(s) and/or run the specified X-Window application on the target system(s). This tool can be scheduled.
- CMS tool** - A tool that runs on the central management server (CMS). It is usually a script or a batch file, and can pass in environment variables. Using Automatic Event Handling, this tool can optionally be configured to run when events are received. This tool can be scheduled.
- Web page tool** - A tool that launches a web URL. The URL is launched in a separate browser window, and the tool cannot be scheduled.
