Virtual connect Flex-10 Uplink Port Mappings

It is important to note how the external uplink ports on the Flex-10 module are configured. The graphic below outlines the type and speed each port can be configured as.

- Ports X1 – X8; Can be configured as 1Gb or 10Gb Ethernet
- Ports X7 – X8; Are also shared as internal cross connect and should not be used for external connections, at the very least one horizontal stacking link is required, if modules are in adjacent bays.
- Uplink Ports X1-X8 support 0.5–7m length DAC as stacking or uplink
- The CX-4 connection is shared with port X1, only one of these connections, either the CX-4 or SFP+ X1, can be used at a time.
