QUESTION 1

Which best practice can be considered when building an iSCSI network with high availability as a key deliverable?

A. Ensure iSCSI traffic flows through the same broadcast domain as user traffic.

B. Set iSCSI MTUs to 9000 and switch to 1500.

C. Disable flowcontrol on the Ethernet switches.

D. Separate iSCSI traffic from user traffic separate physical switches.

Correct Answer: D

QUESTION 2

Under Intelligent Provisioning Preferences, which options are available to update the System Software Update? (Select two)

A. iLO 4 virtual media

B. DVD drive

C. FTP

D. HP website

E. USB drive

Correct Answer: CD

Reference: http://h20000.www2.hp.com/bc/docs/support/SupportManual/c03467131/c03467131.pdf (page 6, User interface issues, 10th bulleted point)

Select how you would like System Software Updates delivered.

Delivery options include:

• **HP Web Site**—HP recommends selecting this option to be prompted when updates are available and download all software updates for your server from hp.com.

• **HTTP/FTP**—When prompted, enter an address in the URL field.

• **Disable**—Select this to disable automatic updates if you plan to update your system software manually.

QUESTION 3

What is an advantage of the HP D2200sb Storage Blade?

A. Increases available direct attached storage within a blade server

B. Is optimized for boot from SAN environments

C. Provides shared storage within a blade enclosure

D. Delivers better performance than external drives

Correct Answer: A

Reference: http://h10010.www1.hp.com/wwpc/us/en/sm/WF05a/3709945-3709945-3710114-3722820- (see the paragraph adjacent to the image) 3722776-4304942.html?dnr=1

Overview

Do you need a direct attached or shared storage solution within your BladeSystem enclosure? The D2200sb Storage Blade delivers direct attached storage for c- Class servers, with support for up to twelve SFF SAS hard disk drives or SAS/

SATA SSDs or SATA Midline hard drives. The enclosure backplane provides a PCI Express connection to the adjacent c-Class server blade and enables high performance storage access without any additional cables. The D2200sb features

the onboard Smart Array P410i controller with 1 GB flashbacked write cache, for increased performance and data protection.

Use the HP StoreVirtual VSA to turn the D2200sb into an iSCSI SAN for use by all severs in the enclosure and any server on the network. VSA includes remote replication capabilities, thin provisioning, and snapshot.

Combine the D2200sb with the HP X1800sb Network Storage Blade to enable file serving iSCSI shared storage inside the BladeSystem enclosure.

QUESTION 4

An engineer installs four HP Virtual Connect Flex-10 10 Gb Ethernet modules into a c7000 enclosure. What is required to enable all Ethernet NICs on all servers to have access to any Virtual Connect Ethernet module uplink port?

A. External stacking links between the interconnects

B. Virtual Connect Enterprise Manager license

C. HP Insight Control central management server (CMS)

D. Internal stacking link enablement for all modules in the Onboard Administrator interface

Correct Answer: A

QUESTION 5

During a planning session, a customer is exploring virtualization solutions and asks if there is virtualization solution that can minimize downtime in case of server failure. Which solution meets this equipment?

A. VMware vSphere Fault Tolerance virtual machine solution

B. VMware vSphere DRS Cluster solution

C. Microsoft Computer Cluster solution

D. Microsoft Windows Server 2008 R2 cluster using majority model

Correct Answer: A

D is also and acceptable answer if it allows for two choices. Because D allows for fault tolerance as well.
