QUESTION 1

Which modification has been introduced with StoreOnce firmware 3.9.0?

A. Root access has been disabled and restricted to HP support staff only.

B. The default Admin account can now be reset via Root access,

C. Mandatory 90 day password reset has been enforced on Root access.

D. Active Directory access control to the root directory has been added.

Correct Answer: B

QUESTION 2

Your customer implements some changes within the existing TCP/IP environment. The changes affect the existing HP StoreOnce Multi-node environment and the current backup infrastructure. How can you apply the new network configuration on the HP StoreOnce 6500 Backup system?

A. Replace the old configuration with the correct TCP/IP information using the CLI parameter Pnet set change, and reboot the cluster nodes.

B. Configure an alternate network template, and then re-apply the template with all the modified network settings.

C. Access the console of the first node, change all the parameters, and sync the nodes within the cluster.

D. Modify the configuration using the GUI (Device configuration - Network), and apply the configuration.

Correct Answer: A

QUESTION 3

Which statements are true when encrypting HP StoreOnce Catalyst stores? (Select two.)

A. Data encryption is performed after the data has been written to the store.

B. Encryption cannot be enabled once a store has been created.

C. Encryption cannot be disabled once it has been set for a Catalyst store.

D. Data on the store will be deleted when encryption is disabled on a store.

E. Encryption needs to be enabled from the CLI after the store is created.

Correct Answer: BC

QUESTION 4

Which statement is correct when planning the installation of the HP StoreOnce Enterprise Manager?

A. The license is integrated in the HP StoreOnce Security Pack.

B. The license is free for all existing HP StoreOnce customers.

C. The license is free only for customers that are using replication.

D. The license is free only for HP StoreOnce Multi-node customers.

Correct Answer: B

QUESTION 5

Your customer wants to add their HP StoreOnce Backup device to an Active Directory domain. How can this task be completed?

A. from the StoreOnce WMI, from the NAS menu tree

B. from the CLI, using the system add security command

C. from the StoreOnce WMI, from the Catalyst menu tree

D. from the CLI, using the system set config command

Correct Answer: D
