**QUESTION 1**

How does HP TippingPoint provide filter updates?

- A. TippingPoint Operating System
- B. IGRP
- C. Digital vaccine
- D. Hot Patch Install

Correct Answer: C

Digital Vaccine filters Using HP TippingPoint's Threat Management Center (TMC), the DV Labs team continually searches for emerging vulnerabilities and develops new attack filters to block network attacks. Filter updates provide rapid inoculation against emerging threats. Digital Vaccine filters are delivered at least once per week or on a prioritized basis as critical vulnerabilities are identified; filters can be deployed automatically with no user interaction required.
