QUESTION 1

What are the key business and IT challenges faced by application delivery organizations with respect to quality management? (Select three.)

A. improvement of time to market

B. disaster recovery and availability

C. difficulty in managing heterogeneous environments

D. mitigate risk

E. elimination of rework and cost across the enterprise

F. rapidly-growing cloud adoption and virtualization

Correct Answer: CDE

QUESTION 2

Which statement is most accurate with respect to Application Security validation AND is most likely a concern of the VP of Applications?

A. ALM security reduces cost to the business by detecting security threats and blocking unauthorized access to application assets.

B. A leading cause of IT waste (cost) is poor defect management and rework. The HP approach to ALM security improves this by accurately identifying security defects earlier in the application lifecycle where risk can be more efficiently mitigated.

C. A leading cause of IT waste (cost) is poor defect management and rework. The HP approach to ALM security improves this by accurately identifying security defects after an application is in production and by providing actionable information to developers for future updates.

D. The goal of ALM security is to reduce service outages and reduce overall operational costs to the business. ALM security improves the stability and performance of the applications by providing real- time metrics for better business decision making.

Correct Answer: D

QUESTION 3

What is the most accurate statement that describes the value proposition for the HP Unified Functional Test?

A. It easily incorporates changes and sustains simulation models.

B. It protects business critical applications from advanced cyber attacks by removing security vulnerabilities from software.

C. It ensures higher quality by automating end-to-end testing.

D. It mitigates risk by identifying the cause of performance bottlenecks and reducing MTTR.

Correct Answer: C
