---

**QUESTION 2**

Which methods are available to optimize a projection for delete processing? (Select two.)

- A. Add a low cardinality column to the beginning of all projections on the source table.
- B. Add a high cardinality column to the end of all projections on the source table.
- C. Add all columns used as delete predicates to all projections on the source table.
- D. Add a low cardinality column to the end of all projections on the source table.
- E. Add a high cardinality column to the beginning of all projections on the source table.

Correct Answer: AC

---

**QUESTION 3**

What is the WOS?

- A. a redundant copy of commonly read data, cached in memory
- B. a column-store, disk-based method for storing data in Vertica
- C. a redundant write-only location used to improve node uptime
- D. a row-store, memory-based method for adding data to Vertica

Correct Answer: D

---

#### QUESTION 4

What is available on the Jobs chart in the Management Console? (Select two)

- A. loading status and errors
- B. resource pool usage
- C. memory usage
- D. recovery progress and errors
- E. query performance

Correct Answer: AD

---

#### QUESTION 5

What is the purpose of Vertical's transaction model? (Select three.)

- A. Transactions mean that undo logs are not needed.
- B. Transactions are used to maintain partitions.
- C. Transactions are only written upon an explicit commit being issued.
- D. Transactions are used for data recovery.
- E. Transactions are used to delete data.
- F. Transactions are used to maintain segmentation.

Correct Answer: AC
