QUESTION 1

How can testers create functional performance, and application security defects in the HP Quality Center?

- A. by using the defect submission and reporting wizard found in QCE
- B. manually or directly from the execution of manual and automated tests
- C. by importing a list in a pdf file
- D. only through the execution of automated tests

Correct Answer: B

QUESTION 2

Who would be a day-to-day user of HP Agile Manager?

- A. VP of apps and operations
- B. business analysts
- C. software development team
- D. performance test designers

Correct Answer: C

QUESTION 3

Which most accurately describes the HP Application Lifecycle Management suite?

- A. a unified software suite for accelerating the delivery of secure, reliable, modern applications
- B. a product used to manage test requirements through application delivery
- C. a solution that allows management of application lifecycle as a business process
- D. a suite of stand-alone tools for accelerating the delivery of secure, reliable, modern applications

Correct Answer: A

QUESTION 4

How does HP Service Virtualization improve software delivery?

- A. By making virtualization a standard part of the testing process, designers ensure that developers are on hand to assist in case anything goes wrong during regression testing.

- B. By virtualizing services when needed, test designers can automate steps, reuse test components, and validate modern mobile and composite applications at a faster rate
- C. By virtualizing services, the number of people needed to conduct functional or regression testing of the software is reduced
- D. By introducing virtualization, stakeholders are assured that the IT organization's goals are clearly aligned with the goals of the business.

Correct Answer: A

QUESTION 5

The CFO of an organization has raised concerns about the cost of the HP Quality Management solution and its return on investment. Which factor should be considered most important to include in addressing these concerns?

- A. HP can reduce time and costs of testing with automation while also improving customer satisfaction and the overall quality of software delivery.
- B. HP solutions can reduce costs of delivery for an organization, and HP offers special financing and discounts for enterprise customers
- C. HP Quality Center is an open platform that allows application teams to work in a single environment without having to manage multiple tools, and HP professional services can accelerate time to value.
- D. HP Quality Management offerings help organizations reduce up-front costs and realize an average savings in quality management of 20% to 40% with a lower total cost of ownership.

Correct Answer: A
