### QUESTION 1

Which statement is correct about the HP iLO Management Engine?

- A. The health driver (agent management) is the only tool for SIM to collect server information from the iLO Management Engine.
- B. Intelligent Provisioning is one of the major features residing in the iLO Management Engine.
- C. The Active Health feature in the iLO Management Engine does not monitor hardware.
- D. It does not apply to ProLiant 100 G8 series.

Correct Answer: B

Features under HP iLO Management Engine include, HP iLO, HP Intelligent Provisioning, HP Agentless Management and HP Active Health System.

---

### QUESTION 2

Which RAID level allows the data to be striped across multiple RAID sets? (Select two.)

- A. RAID 0
- B. RAID 1
- C. RAID 5
- D. RAID 50
- E. RAID 60

Correct Answer: DE

D: RAID level 50 is a combination of RAID level 5 and RAID level 0. RAID 50 includes both parity and disk striping across multiple drives. RAID 50 is best implemented across two RAID 5 arrays with data striped across both disk arrays. RAID

50 breaks the data into smaller blocks, and then stripes the blocks to each RAID 5 raid set. RAID 5 breaks up data into smaller blocks, calculates parity by performing an Exclusive OR on the blocks, and then writes the blocks of data and

parity to each drive in the array. The size of each block is determined by the stripe size parameter, which is set when the RAID is created.

E: A RAID 60 combines the straight block-level striping of RAID 0 with the distributed double parity of RAID

6. That is, a RAID 0 array striped across RAID 6 elements. It requires at least eight disks.

Incorrect:

Not A: It is striped, but not across multiple RAID sets.

Not B: Mirror not a stripe.

Not C: Just a single raid.

### QUESTION 3

What must you consider when installing redundant fans?

- A. Locate the fans as specified in the server's documentation.
- B. Locate redundant fans on the side of the CPU.
- C. Locate the fans on the memory side.
- D. Place redundant fans in any location.

Correct Answer: A

Note:

\* Example:

HP Support document

ProLiant DL380 G3 - Configuring the System Fans

You must observe the following requirements when installing redundant hot-plug fans:

To ensure optimum cooling, populate the primary fan locations, 2, 4, 5, 6, and 7, before populating the redundant locations.

If a primary fan fails, replace the non functioning fan before installing fans in redundant locations.

#### QUESTION 4

What are the upgrade options on HP FlexLOM? (Select two.)

- A. 100Mb/s
- B. 1 Gb/s
- C. 10 Gb/s
- D. 100 Gb/s

Correct Answer: BC

HP FlexLOM Provides choice

\*

Upgrade options of 1Gb and 10Gb

Choose your fabric

\*

Ethernet, FlexFabric, Flex-10, Infiniband Universal

\*

Available on all BL, SL and select DL servers Flexible

\*

Supports shared iLO port like the traditional LOM

---

#### QUESTION 5

How can you validate the installed firmware versions on an HP Integrity rx2800 i2 server? (Select two.)

- A. Check the FW Revisions tab in the iLO web GUI.
- B. Use the fw command on the iLO.
- C. Check the firmware information in the Virtual Front Panel (VFP) on the iLO.
- D. Check the firmware information in the UEFI main menu.
- E. Use the sysrev command on the iLO.

Correct Answer: DE

D: UEFI Shell:

```
Option Rom Configuration for Arrays, version 3.28
Copyright 2009 Hewlett-Packard Development Company, L.P.
Controller: HP Smart Array P410i

+-----Main Menu-----+
| Create Logical Drive    |
| View Logical Drive     |
| Delete Logical Drive   |
| Manage License Keys    |
+-----+

<Enter> to create a new logical drive
<UP/DOWN ARROW> to select main menu option; <ESC> to exit
```

E (not B): Use the SR or sysrev command from the iLO Command Menu (CM:hpiLO) to display the current firmware revisions.
