**QUESTION 1**

Which task should a network administrator include in the creation of an upgrade policy?

- A. Update network management software before deploying upgrades to network switches.
- B. Make a copy of the original operating system.
- C. Test the upgrade on a core switch.
- D. Read the release notes of the original operating system.

Correct Answer: B

---

**QUESTION 2**

Which trends of today's data center networks is the HP FlexNetwork Architecture designed to meet?

- A. virtualization
- B. Intelligent Resilient Framework
- C. network analytics
- D. server decentralization

Correct Answer: A

---

**QUESTION 3**

A network administrator has an HP Comware switch that is configured with OSPF. The network administrator views the routing table and sees that a default route was learned from an OSPF neighbor (10.1.1.1). However, the network administrator wants to override this action and use a different neighbor (10.1.1.2) for the default route.

The network administrator configures this command:

```
[Comware] ip route-static 0.0.0.0 0 10.1.1.2
```

After configuring the command, the network administrator examines the routing table and notices that the original neighbor's default route is still in the routing table, but the static route is missing.

What is the cause of this problem?

- A. OSPF routes have a lower precedence value
- B. The ip default-gateway command must be used when creating a default route
- C. Only one routing protocol can be operational on a Comware device
- D. The static route has a syntax mistake

Correct Answer: A

---

#### QUESTION 4

Which URL can a network administrator use to access Intelligent Management Center (IMC)?

A. `http://«ip-address> | | |`
