QUESTION 1

After a performance analysis, a customer plan to reorganize his adaptive Flash cache (AFC) configuration and want to raise it from 256 to 768GB. Which action is needed to take advantage of the new AFC configuration?

A. Remove flash cache for all VVS then run create Flash cache

B. Increase current AFC configuration to reflect the additional space

C. Remove the old AO configuration and recreate a new one

D. Run tunesys after raising the AFC to take advantage of the additional space

Correct Answer: A

QUESTION 2

Exhibit: The customer has upgraded the first of their two HPE StoreServ 8200to the latest inform OS version to take the advantage of the compression feature .You have been asked to design the storage configuration to support oracle database volume to utilize HPE 3PAR compression . Based on the analysis of the array .what would be your suggestion to implement the requested change?

A. Install the catalyst agent on the oracle server to enable inline compression on the selected VV

B. Configure the source-side the compression to offload compression to the Host

C. Balance the workloads between the arrays to have enough headroom for compression

D. Consider adding another node pair for compression to work efficiently

Correct Answer: A

QUESTION 3

Which management interface uses four basic commands (Create ,read, update ad delete)to enable administrators to define ad radically simply management processes?

A. Rest API

B. WMI

C. SMI-S

D. WEBEM

Correct Answer: A

QUESTION 4

Drag and Drop

Match the data access type in a SAN fabric to the correct description.

Select and Place:

| Data Access Type	Description
Centralized	Data access between a local server and a storage system connected to the same switch
Distributed	Data access between multiple, dispersed servers and one storage system
Local	Data access between multiple, dispersed servers and multiple storage systems

Correct Answer:

Data Access Type	Description
	Local — Data access between a local server and a storage system connected to the same switch
	Centralized — Data access between multiple, dispersed servers and one storage system
	Distributed — Data access between multiple, dispersed servers and multiple storage systems

---

QUESTION 5

A customer has mission-critical applications that intermittently experience heavy disk I/O. The storage speed has the

most impact on the application\\'s performance. The customer does not want to dedicate SSD disks to these applications because additional performance is only needed periodically, and moving the volumes between tiers takes too long. Which HPE StoreVirtual VSA feature can address this customer\\'s challenge?

A. Storage virtualization

B. Space Reclamation

C. Thin Provisioning

D. Adaptive Optimization

Correct Answer: D
