**QUESTION 1**

A customer needs to offload disk I/O caused by nightly backups from their production HPE 3PAR StoreServ Disk Array. They have two other HPE 3PAR Disk Arrays. One is located at their disaster recovery (DR) site located 300 km away, and the other is used for their Test/Dev environment located in the same datacenter.

What should you recommend to accomplish this? (Select two)

- A. Set up HPE 3PAR synchronous replication between the production and Test/Dev disk arrays.
- B. Create a snapshot of the replicated volumes on the production array and present to the backup system.
- C. Set up HPE 3PAR synchronous replication between the production and DR disk arrays.
- D. Create a snapshot of the replicated volumes on the Test/Dev array and present to the backup system.
- E. Set up HPE 3PAR enhanced asynchronous replication between the production and DR disk arrays.

Correct Answer: AD

QUESTION 2

Which statement is correct about enabling data-at-rest or in-flight encryption on a physical HPE StoreOnce appliance?

- A. Encryption is enabled by default
- B. Encryption is not possible on HPE StoreOnce
- C. Encryption is a function of the backup application.
- D. The HPE StoreOnce Security Pack license must be installed

Correct Answer: D

QUESTION 3

When zoning by NBA port in large SAN infrastructures, which feature is a benefit?

- A. prevention of zone overlapping
- B. server-side duplication +
- C. simplified device discovery
- D. SAN attached storage backups

Correct Answer: C

QUESTION 4

Match each type of deduplication to the location where it occurs

Select and Place:

| | | |
|--------------------------|----------------------|---------------------------|
| application server | <input type="text"/> | server-side deduplication |
| backup to disk appliance | <input type="text"/> | source-side deduplication |
| backup server | <input type="text"/> | target-side deduplication |

Correct Answer:

| | | |
|----------------------|--------------------------|---------------------------|
| <input type="text"/> | backup server | server-side deduplication |
| <input type="text"/> | application server | source-side deduplication |
| <input type="text"/> | backup to disk appliance | target-side deduplication |

QUESTION 5

A new customer runs a graphic art and employing 50 people and is very concerned about the potential cost of a major disk or system failure Which SMB business priority addresses this customer's challenge?

- A. Business Growth
