-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

A customer has two data centers approximately 50 miles (80 km) apart with an HPE 3PAR StoreServ 8000 in each one. Both arrays have the Replication Suite license installed.

The current backup solution is based on a tape backup that regularly exceeds their backup window. There are also concerns about securing the physical tapes. Your backup solution must address all of their concerns and keep costs to a minimum.

Which HPE product should you incorporate in your design?

- A. HPE 3PAR Remote Copy Software
- B. HPE 3PAR Cluster Extension
- C. HPE StoreOnce Recovery Manager Central
- D. HPE StoreOnce Backup System with Catalyst

Correct Answer: D

---

**QUESTION 2**

You are demonstrating to a potential customer how easy it is to replicate data from one HPE 3PAR StoreServ array to another. The demonstration is being done with both arrays connected to a pair of SAN switches. The customer asks what it would take to extend their SAN over very large distances.

What should you recommend they use to accomplish this?

- A. multi-mode replication
- B. wave division multiplexing
- C. FCIP routing
- D. low-bandwidth replication

Correct Answer: C

---

**QUESTION 3**

A Customer has two sites that are 100 miles (160 km) apart. Each site is 100 percent virtualized and has identical storage and server infrastructure, running active/active environment with array based replication. The customer needs a solution that enables them to recover either site with minimal input from their IT teams, while meeting their two hour RTO and 15 minutes RPO SLAs.

What should you recommend to improve this customer's current infrastructure?

- A. VMware Site Recovery Manager
- B. VMware vCenter Operations Manager

- C. HPE 3PAR Remote Copy Software
- D. VMware vRealize automation

Correct Answer: A

#### QUESTION 4

Refer to Exhibit:

Max 3PAR StorServ Storage arrays	16	8	4	2
Max 3PAR Vols	64k	32k	16k	8k
Max StoreOnce Backup systems	16	8	4	2
Max StoreOnce Catalyst Stores	192	96	48	24
No of Snapshots per minute without backup	160	160	160	96
No of Snapshots per minute with backup	80	80	80	48
Max Recovery Sets Backed Up In Parallel	32	16	8	4
Max Volumes Per Recovery Set	8	8	8	8
Max Volume Size	16 TB	16 TB	16 TB	16 TB
Max Streams Per Volume	16	16	16	16
Max synthetic full speed (TB/hr)	80	40	20	10
Max restore speed (TB/hr)	5	5	4	2
Max Streams	256	128	64	32

Notes:  
 1. Migration does not support multi-RMC configuration. It is advised to first configure single RMC instance and migrate the data and then add other RMC instances  
 2. Multi RMC is not supported for 3PAR Remote Copy Solution  
 3. Internet Explorer is not supported for upgrading from RMC 1.0 to 1.1

You size an HPE Recovery Manager Central (RMC) solution for a customer's environment. The customer uses two HPE StoreServ systems and wants to run eight Recovery Set backups in parallel. To achieve the RTO, 4.5 TB of data must be restored per hour

What is the minimum configuration that must be planned for the RMC host?

- A. 2 vCPU / 8 GB VRAM
- B. 4vCPU/16GBvRAM
- C. 8 vCPU / 32 GB VRAM
- D. 16 vCPU/64 GB VRAM

Correct Answer: C

#### QUESTION 5

When designing a backup solution using the Centralized Server Backup model, what must be considered?

- A. Dedicated SAN backup fabric is required.
- B. LAN performance may be a bottleneck
- C. There may be increased media management difficulties.
- D. There may be a decrease in the number of tape libraries.
