QUESTION 1

Which additional value should you focus on during a solution presentation for an HPE 3PAR StoreServ system using 3.84 TB cMLC SSD drives to appeal to the interests of the company\\'s CFO?

A. savings of the solution when compared to a similar configuration using 10 k SAS drives

B. savings of the solution when compared to 1.92 TB cMLC SSD

C. performance gain when compared to 1.92 TB cMLC SSD

D. savings of the solution, which approaches the cost of 15 K SAS drives

Correct Answer: A

QUESTION 2

Which object is the unit of failover for HPE 3PAR StoreServ File Persona?

A. File Provisioning Group

B. File Share

C. File Store

D. Virtual File Server

Correct Answer: D

QUESTION 3

You are proposing an HPE 3PAR StoreServ solution to a new customer who has never owned HPE Storage products. The customer is interested in migrating their data from the existing solution with minimal service impact.

Which HPE 3PAR StoreServ feature option should you introduce to this customer?

A. attaching an HPE 3PAR StoreServ management application to other vendors\\' storage systems

B. moving data off other vendor\\'s arrays onto HPE 3PAR StoreServ arrays with online import

C. importing space-efficient snapshots created on other arrays for backup purposes

D. re-purposing disk drives from other arrays

Correct Answer: A

QUESTION 4

You are talking to a prospective customer at a medium-to-large enterprise company about an upcoming storage refresh

project for their legacy architecture storage platforms. The customer mentions that as the size and types of workloads grew on their present storage arrays, they got slower in terms of IOPS and throughout in a few cases, this forced them to purchase additional arrays to off-load some of the workload. They noticed the same impact to performance when they enabled array-based replication.

Which HPE 3PAR StoreServ architecture feature will solve these issues?

A. The HPE 3PAR ASIC offloads IO workload performed by microprocessors in legacy storage array platforms.

B. The HPE StoreServ storage array uses a high-speed, full-mesh, active interconnect to join multiple controller nodes together to form a cache-coherent cluster across the entire array.

C. The shared links between the controller node and each of the other nodes operates at a 4 GB/s full duplex to adequately support the clustering of controller nodes and movement of data between nodes.

D. The HPE 3PAR StoreServ storage array is an ideal high availability platform that runs its operating system in a single instance.

Correct Answer: A

QUESTION 5

During a meeting with a logistics service provider, the CFO and CIO complain about their existing business intelligence (BI) solution because of its unsatisfactory performance. The CFO is focused on a high ROI and low TCO for the new storage solution. The design parameters to size solution are:

-30K IOPS

-4 TB database size

-

VMware vSphere used as Hypervisor

Which HPE 3PAR StoreServ storage configuration should you propose?

A.

HPE 3PAR StoreServ 8400 2-node with 41,92 TB SSD drives for Adaptive Flash Cache and 12900 GB 15 k drives. Base OS and Optimization Suite v2 licenses.

B.

HPE 3PAR StoreServ 8200 with 4480 GB MLC SSD drives for Adaptive Flash Cache, 121900 GB 10 k drives. Base OS, and Optimization Suite v2 licenses.

C.

HPE 3PAR StoreServ 8200 with 250600 GB 15 k disks, Base OS, and Optimization Suite v2 licenses.

D.

HPE 3PAR StoreServ 8200 with 81,92 TB cMLC SSD drives, Base OS licenses.

Correct Answer: C
