### QUESTION 1

Which tools can an architect use to check details about a hard drive error on an HPE ProLiant Gen9 server before the operating system is installed? (Select two.)

- A. System Management Homepage
- B. ProLiant WBEM Providers
- C. Integrated Management Log (IML) from iLO4
- D. Integrated Management Log (IML) from Intelligent Provisioning
- E. Insight Management Agents

Correct Answer: CD

---

### QUESTION 2

Why does HPE OneView not affect operating systems security on monitored HPE ProLiant Gen9 servers?

- A. It sets secure usernames and strong passwords in the server operating system.
- B. It uses iLO embedded SNMP stack to receive hardware alerts.
- C. It relies on Kerberos for health-related communications.
- D. It uses certificate-based authentication for health-related communications.

Correct Answer: B

---

### QUESTION 3

A customer has acquired another company with a large install base of HPE BladeSystem servers with Virtual Connect managed by HPE OneView. The customer needs the ability to easily record its new assets in its configuration management database (CMDB).

Which approach should the architect recommend to the customer?

- A. Use VCEM to create a customized report to find all blade servers, and use the results for import into the CMDB.
- B. Back up the HPE OneView appliance database, and use the bulk copy capability of the CMDB to insert the records.
- C. Use the REST API to retrieve a list of server resources and their properties from the HPE OneView appliance for import into the CMDB.
- D. Use iLO Federation groups, and select the multi-system view to gather the hardware types and serial numbers of each server in the group for import into the CMDB.

Correct Answer: C

---

#### QUESTION 4

Select all that apply.

Drag each HPE Proliant rack server profile on the left to the matching description in the right.

Select and Place:

Rack server profile		Description
Entry	<input type="text"/>	Low VM density
Growth	<input type="text"/>	File and print
Traditional	<input type="text"/>	Monolithic applications
Scale UP	<input type="text"/>	Mission-critical apps

Correct Answer:

Rack server profile		Description
	Traditional	Low VM density
	Entry	File and print
	Scale UP	Monolithic applications
	Growth	Mission-critical apps

#### QUESTION 5

A customer requests a Proof of Concept for virtualization. To ensure a seamless deployment of virtualization, the customer needs to evaluate the various hypervisors and the associated management suites that integrate with the existing HPE server, storage and networking infrastructure.

Which virtualization solutions should the architect recommend to the customer for the Proof of Concept (Select two.)

- A. Kitematic by Docker
- B. Citrix XenApp
- C. Microsoft System Center
- D. Integrity VM

E. VMware vCenter

Correct Answer: BE
