### QUESTION 1

A customer needs an API that meets the following requirements:

What should the customer use?

- A. XML
- B. SNMP
- C. REST
- D. JAVA

Correct Answer: C

---

### QUESTION 2

A customer plans to use Apollo 6000 chassis for scalability and efficiency. The customer will deploy an application cluster that requires two I/O accelerator cards per server for optimum performance.

Which server should the architect recommend to the customer?

- A. XL250aGen9 server tray
- B. XL230a Gen9 server tray
- C. XL220a Gen8 v2 server tray
- D. DL380 Gen9

Correct Answer: A

---

### QUESTION 3

An architect is working with a customer to design a new data center that can take advantage of free-cooling.

Which HPE solution should the architect recommend to the customer?

- A. ASHRAE A4 compliant HPE ProLiant Gen9 servers
- B. HPE Intelligent Power Distribution Units (iPDU)
- C. HPE ProLiant Gen9 servers with 96 percent (Titanium) efficiency power supplies
- D. HPE Modular Cooling System server cabinets

Correct Answer: A

---

#### QUESTION 4

Select all that apply.

Click and drag the HPE Proliant Gen9 value on the left to match its customer benefit on the right.

Select and Place:

HPE Proliant Gen9 Value		Customer Benefits
increased capacity and lower TCO	<input type="checkbox"/>	support for 1 million IOPS with 12 Gb/s HPE Smart Array fast controllers
move faster with management automation	<input type="checkbox"/>	flexible choices in storage, networking, and power supplies
accelerate application performance	<input type="checkbox"/>	faster provisioning with software-defined HPE OneView

Correct Answer:

#### QUESTION 5

A customer plans to use Flat SAN technology to connect a new storage system.

Why would the customer choose the Virtual Connect Flat SAN technology connected to a 3PAR StorServ storage system versus a competitive solution?

- A. It helps create multi-tiered SANs, and increases throughput and resiliency.
- B. It eliminates the SAN fabric by off-loading the workload to a switch.
- C. It reduces the number of component, lowers latency, and speeds deployment.
- D. It uses the RESTful API connections to simplify managing the entire solution.

Correct Answer: C
