QUESTION 1

A customer is building an isolated management network for Gen8/Gen9 servers. The customer plans to use the iLO federation feature for all of them.

What should the architect verify when proposing network infrastructure for this purpose?

A. that the SNMP is enabled on all of the servers within the same iLO Federation group

B. that the managed servers are equipped with network adapters supporting VXLAN

C. that the switches that management ports will be connected to will support multicast

D. that the customer has licenses for intelligent Resilient Framework functionality

Correct Answer: B

QUESTION 2

An architect has designed a server solution for a customer that includes ProLiant BL460c Gen9 server blades with Smart Array P244br controller. The customer needs to be able to configure, manage, and troubleshoot the locally attached storage in this solution. Which HPE tool should the architect recommend to the customer?

A. HPE Smart Storage Administrator

B. HPE Array Configuration Utility

C. HPE Insight Remote Support

D. HPE iLO

Correct Answer: A

QUESTION 3

A customer needs an API that meets the following requirements:

What should the customer use?

A. XML

B. SNMP
