**QUESTION 1**

Which element of the HPE Synergy 12000 Frame protects against loops on the MGMT ports that are connected to the external management network?

- A. Image Streamer
- B. Frame Link Modules
- C. Interconnect Modules
- D. Composer

Correct Answer: A

---

**QUESTION 2****HOTSPOT**

A customer has the following HPE Synergy solution:

Three Synergy frames

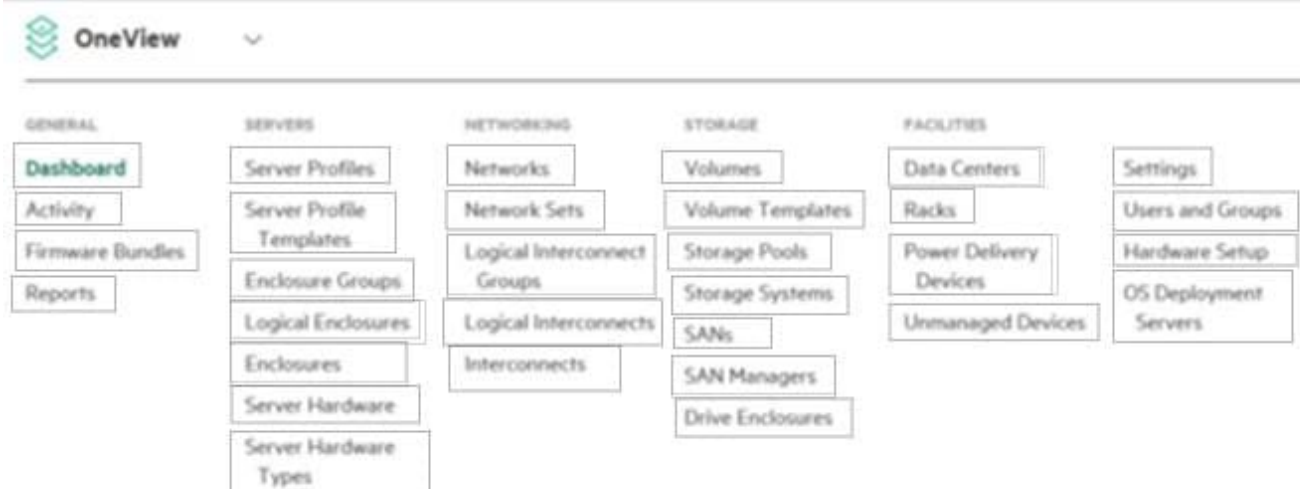

Two HPE Virtual Connect SE 16Gb Fibre Channel (FC) modules in each frame.

Two HPE Virtual Connect SE 40Gb F8 modules

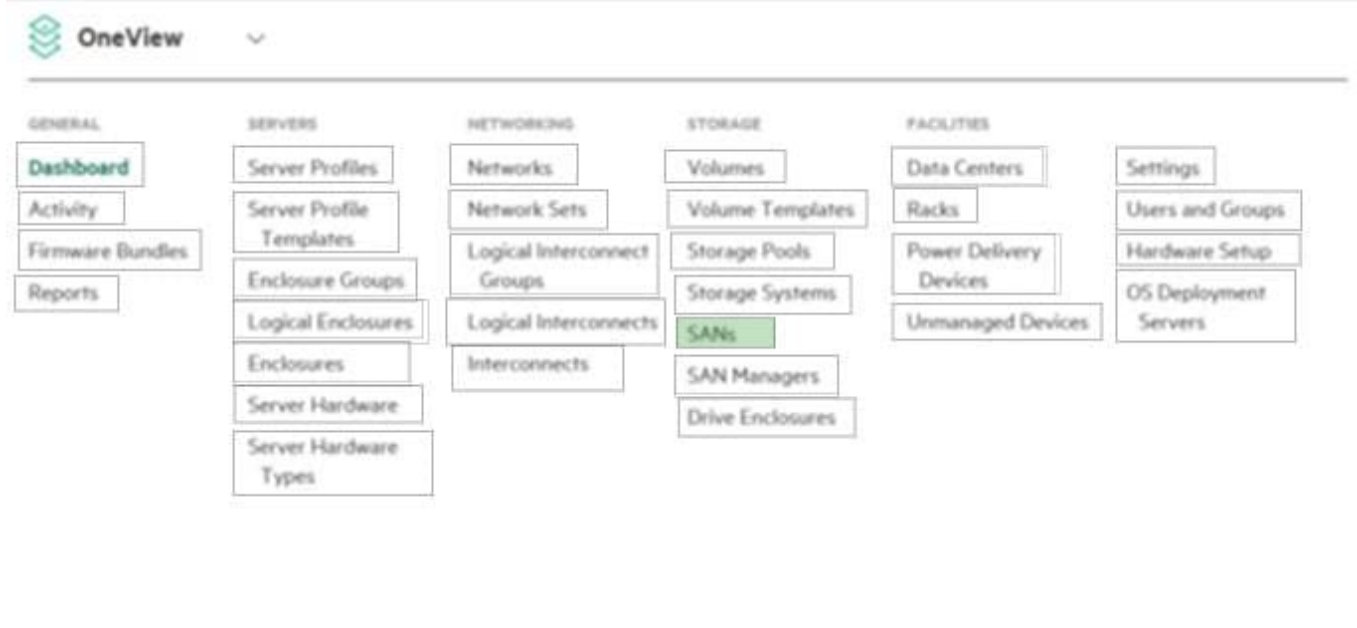

Four HPE Synergy 10Gb Interconnect Link Modules

Click the menu option the Synergy integrator should use to add more uplinks from HPE Virtual Connect SE 16Gb FC modules to SAN switches.

Hot Area:

Correct Answer:

### QUESTION 3

A Synergy integrator is configuring an HPE Synergy environment with two HPE Virtual Connect SE 40Gb F8 modules. The Synergy integrator has four 40Gb uplinks connected to two upstream switches and needs all compute modules to share the full 160Gb of available bandwidth. The upstream switches are interconnected in a virtual port channel (vPC) pair.

What should the integrator do to ensure that the switch configuration does not result in a network loop?

- A. Cross connect the Virtual Connect modules to the upstream switches and select all four 40Gb ports for the uplink. Virtual Connect will automatically configure the Multimodule Link Aggregation Group (MLAG).
- B. Create two separate Virtual Connect uplinks. Select two ports from each module for each uplink. Configure spanning tree protocol (STP) on both Virtual Connect uplinks to default to port forward mode.
- C. Cross connect the Virtual Connect modules to the upstream switches and select all four 40Gb ports for the uplink. Configure spanning tree protocol (STP) on the Virtual Connect uplink to default to port forward mode.
- D. Create two separate Virtual Connect uplinks. Select one port from each module for each uplink. Use two separate Logical interconnect Groups (LIGs) to keep the uplinks from looping.

Correct Answer: B

### QUESTION 4

What should a Synergy integrator do to resolve an unresponsive HPE Synergy Frame Link Module?

- A. Press the reset button on the front of the HPE Synergy Frame.
- B. Remove and reinstall the Frame Link Module in the original bay.
- C. Remove and reinstall the Composer.

D. Disconnect and reconnect the Frame Link Module from the management network.

Correct Answer: B

---

### QUESTION 5

Using a laptop, how can the Synergy integrator perform the initial setup on an HPE Synergy 12000 Frame?

A. Connect a CAT5 cable to the front panel module, use the HPE Synergy default IP address of 192.168.10.31, port 5900, and connect to the HPE Synergy console with VNC.

B. Connect a CAT5 cable to the MGMT port of the top Frame Link Module and connect to the HPE Synergy console with VNC to the address 248.196 port 5900.

C. Connect a CAT5 cable to the front panel module, use the HPE Synergy default IP address of 192.168.10.1, port 5900, and connect to the HPE Synergy console with a web browser.

D. Connect a CAT5 cable to the MGMT port of the top Frame Link Module and connect to the HPE Synergy console with a web browser to the address 192.168.10.1, port 5900.

Correct Answer: B
