**QUESTION 1**

A customer needs a high level of flexibility and the most efficient use of available capacity in their MSA storage system. How should the MSA be configured?

- A. Assign drives directly to servers with Fibre Channel connections on the SAN.
- B. Create multiple virtual volumes in a storage pool to share resources.
- C. Create virtual volumes and map them to a host group without using initiators.
- D. Create a linear disk group and add dedicated spares to the group.

Correct Answer: B

QUESTION 2

You are installing an HPE ProLiant server that has a shared network port for iLO and NIC teaming. You need to ensure that you can still access iLO after configuring the NIC team. Which teaming technology should you configure?

- A. round robin
- B. switch-assisted load balancing
- C. receive load balancing
- D. network fault tolerance

Correct Answer: D

QUESTION 3

A customer requires an entry-level, all-flash storage system with predictable performance at the lowest possible price. They have performance-sensitive workloads that require speed and efficiency. Which HPE storage system meets the customer's requirements?

- A. 3PAR 8450
- B. MSA 2052
- C. StoreVirtual 4335
- D. Nimble AF 1000

Correct Answer: A

QUESTION 4

You need to update the firmware on an MSL2024 to version 26.43.51. Which HPE utility do you need to use?

- A. OneView Standard
- B. Smart Storage Administrator
- C. Central Management Console
- D. Library and Tape Tools

Correct Answer: D

QUESTION 5

You are installing an HPE StoreOnce backup system in a customer's environment. They need a simple and cost-effective method to centralize and automate the backup of multiple servers (file, virtualization, database). They also need the

ability to integrate with an existing third-party backup software.

How must you configure the StoreOnce system to meet the customer's requirements?

- A. block device
- B. replication target
- C. NDMP target
- D. VTL device

Correct Answer: D
