QUESTION 3

An integrator is performing initial configuration of three-frame Synergy solution with HPE Image Streamer. Which networks must be created for this configuration? (Choose two.)

A. management

B. data

C. console

D. deployment

E. internal

Correct Answer: AD

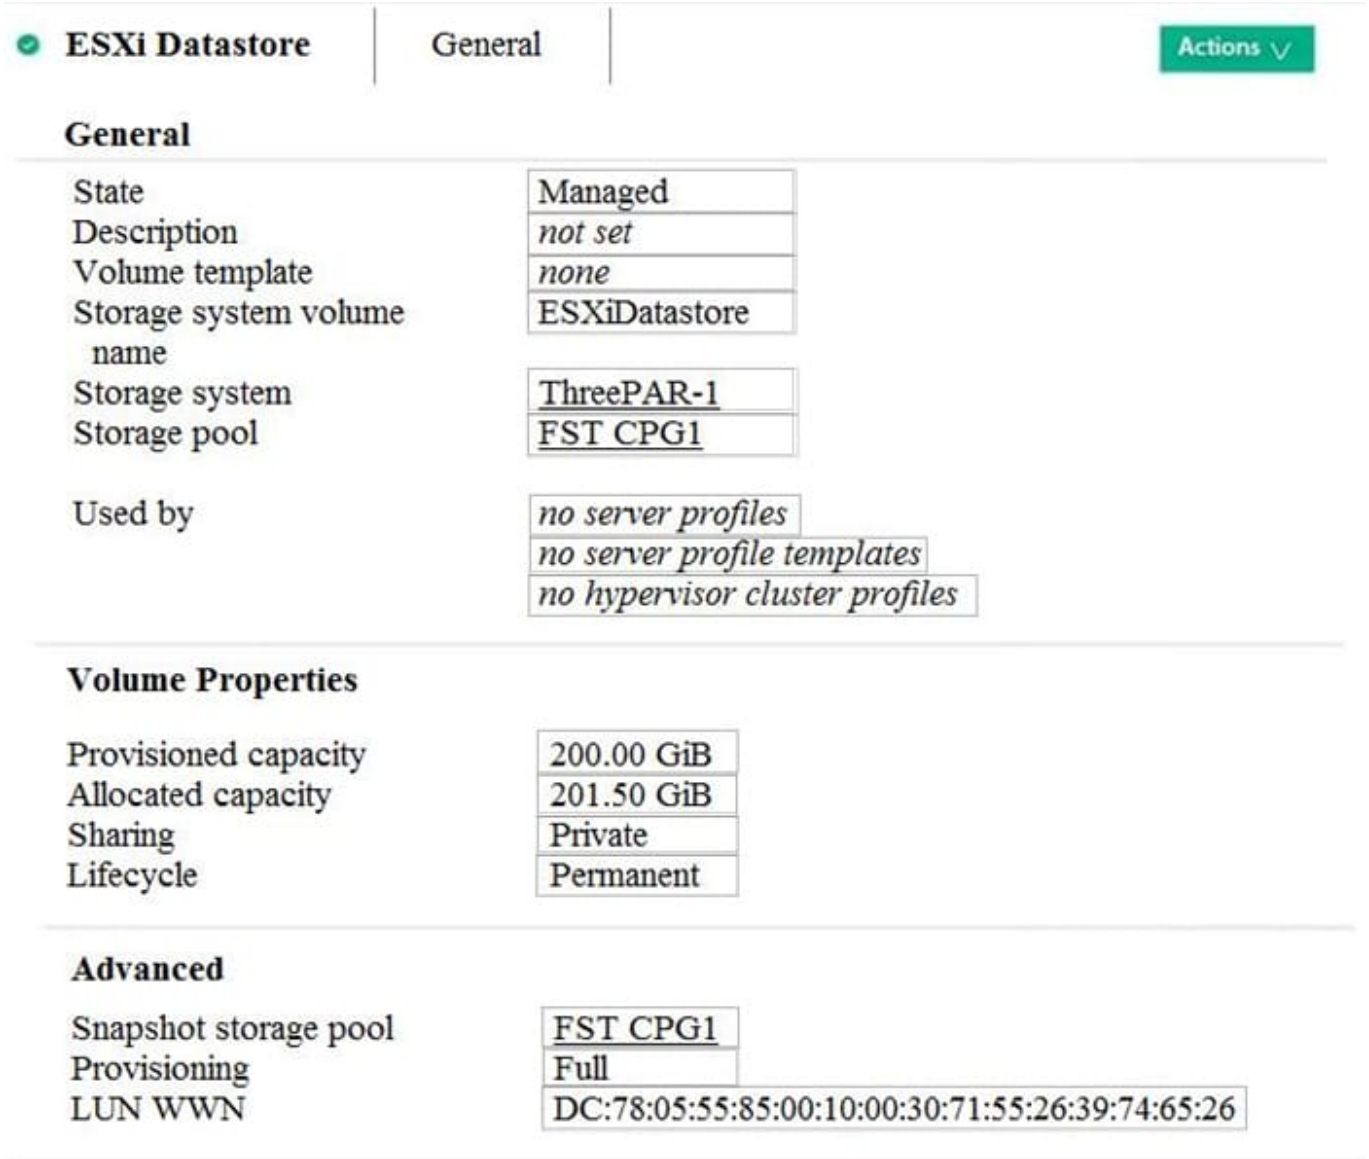
QUESTION 4

HOTSPOT

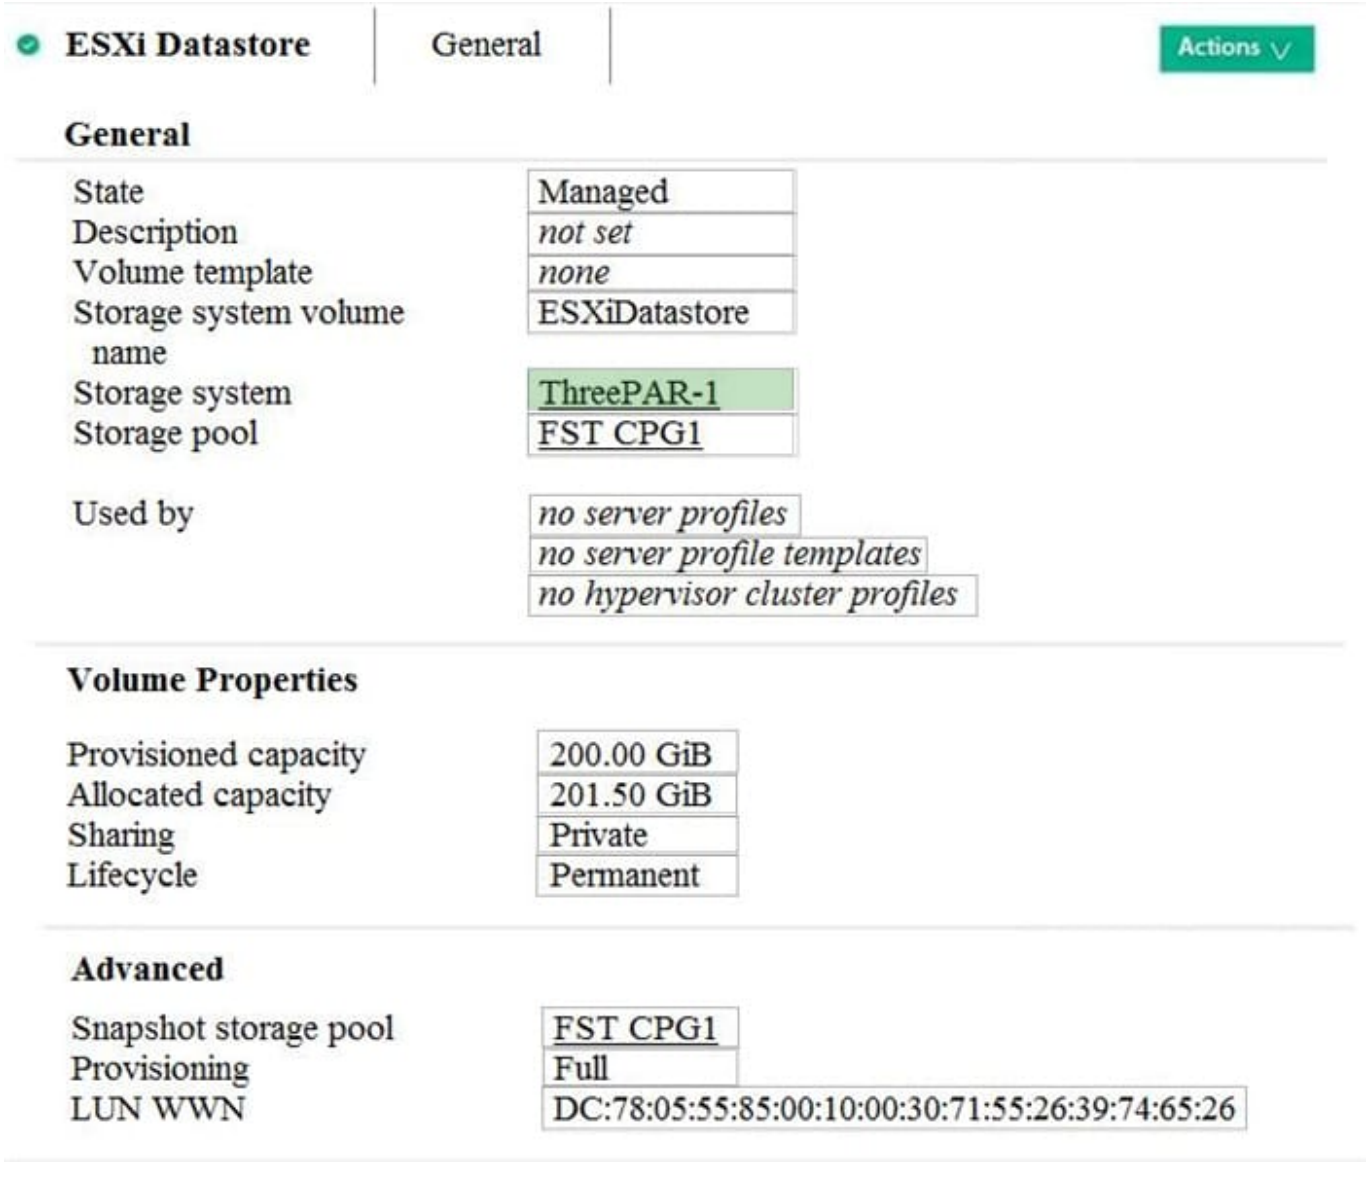
An integrator needs to validate whether the datastore created for ESXi systems based on 3PAR virtual volume can support all DRS cluster functionalities.

Click on the parameter that the integrator needs to verify.

Hot Area:



Correct Answer:



QUESTION 5

An HPE Synergy compute module has a template-based server profile with two identically configured connections, each containing five VLANs. What is the most efficient method the integrator can use to add a new VLAN to each connection?

A. Add the new VLAN to the network set configured in the profile template, and update the server profile from the template

B. Add the new VLAN under Edit server profile connections

C. Add the new VLAN to the network set configured in the profile template

D. Add the new VLAN under Edit server profile connections in the profile template, and update the server profile from the template

Correct Answer: A
