**QUESTION 1**

Refer to the exhibit.

A Synergy integrator needs to establish the module cluster links between two master modules, as shown. Which ports can the integrator use for the module cluster links?

- A. 1 and 2
- B. 3 and 4
- C. 5 and 6
- D. 7 and 8

Correct Answer: D

QUESTION 2

Which HPE Synergy D3940 storage module configuration is valid?

- A. a single RAID set to be shared across the SAS fabric to multiple compute nodes as a virtualization host datastore
- B. maximum of three HPE Synergy D3940 storage modules per frame to be used by any compute module within the management ring
- C. any number of the drives from storage module to be mapped to any single compute node
- D. a pair of disks to house Composer backups and Synergy firmware bundles

Correct Answer: A

QUESTION 3

Refer to the exhibit.

Add Connection

General

Name	<input type="text" value="Connection"/>
Function type	<input type="text" value="Ethernet"/> Specify the device type
Network	<input type="text" value="Fibre Channel"/> <input type="text" value="iSCSI"/> <input type="button" value="Q"/>

An integrator needs to add an FCoE connection to the server profile, but the FCoE connection type is not available.

What is the likely cause of this issue?

- A. FCoE capable interconnect modules are not installed in the Synergy frame
- B. Defined FCoE network is not associated with a SAN or does not have VLAN Id defined
- C. A FCoE connection is not available, as there is no LIG configured for FCoE connectivity
- D. The FCoE connection has not been added as a Fibre Channel connection within a server profile

Correct Answer: D

QUESTION 4

A customer is planning an HPE Synergy solution with 20 frames and needs to minimize the number of management ports that are required to connect the frames into the existing management network. Which procedure should the integrator use to address the customer's concern?

- A. Connect the RJ-45 front ports of each frame to an external switch. Then, connect the uplink from the external switch into the customer's management network.
- B. Connect FLMs from all frames to two external switches for redundancy. Then, connect the two uplinks from the two switches into the customer's management network.
- C. Connect the RJ-45 front ports of each frame to two external switches for redundancy. Then, connect the uplink from the two switches into the customer's management network.
- D. Connect FLMs from all frames into a management ring. Then, connect the management ring to the customer's management network using two uplinks.

Correct Answer: D

QUESTION 5

An integrator prepares deployment documents with the list of all the hardware and software components. The integrator also needs a list of all infrastructure services deployed, with the functionality described.

Which services are provided by the vCenter Server component and should be placed in the report? (Choose two.)

- A. Auto Deploy
- B. Single Sign-On
- C. Update Manager
- D. Lookup Service
- E. Certificate Authority

Correct Answer: CD
