**QUESTION 1****HOTSPOT**

Click the drop-down menu that will allow you to define the location of the master modules within the logical interconnect group.

Hot Area:

**Create Logical Interconnect Group** General ?

**General**

Name

**Logical Interconnect Group**

Using the selectors below, describe the logical interconnect group to be created and then click "Select interconnects" to see the bay and interconnect choices.

Interconnect type

Enclosure count

Interconnect bay set

Redundancy

Downlink speed

**Select interconnects**

Correct Answer:

## Create Logical Interconnect Group

General ▾

?

## General

Name 

## Logical Interconnect Group

Using the selectors below, describe the logical interconnect group to be created and then click "Select interconnects" to see the bay and interconnect choices.

Interconnect type Enclosure count Interconnect bay set Redundancy Downlink speed **Select interconnects**

## QUESTION 2

## DRAG DROP

Match each HPE Synergy logical component with the definition.

Select and Place:

## Component

Enclosure group

Logical enclosure

Logical interconnect

Logical interconnect group

## Definition

Acts as a recipe for creating a group that represents the available networks, uplink sets, and interconnect settings for a set of physical interconnects in a set of enclosures.

A single administrative entity that consists of the configuration for a set of interconnects in a single enclosure or a frame link topology.

A logical resource that defines a consistent configuration for an enclosure or a set of enclosures making up a logical enclosure.

Contains the configuration intended for a set of physical enclosures.

Correct Answer:

Component		Definition
	Logical interconnect group	Acts as a recipe for creating a group that represents the available networks, uplink sets, and interconnect settings for a set of physical interconnects in a set of enclosures.
	Logical interconnect	A single administrative entity that consists of the configuration for a set of interconnects in a single enclosure or a frame link topology.
	Enclosure group	A logical resource that defines a consistent configuration for an enclosure or a set of enclosures making up a logical enclosure.
	Logical enclosure	Contains the configuration intended for a set of physical enclosures.

### QUESTION 3

#### DRAG DROP

Match HPE SimpliVity team with the definition.

Select and Place:

Term		Definition
Arbiter		Non-hyperconverged servers that can exist in an HPE SimpliVity environment and provide additional compute capacity while consuming the storage provided by the hyperconverged nodes.
Compute node		Provides centralized management and events end-point for vCenter.
Intelligent Workload Optimizer		Integrates with VMware Distributed Resources Scheduler to ensure optimal placement of the VM compute resources.
Management Virtual Controller		Facilitates communication between nodes and resolves state conflicts to ensure service continuity.

Correct Answer:

**Term****Definition**

Arbiter	Non-hyperconverged servers that can exist in an HPE SimpliVity environment and provide additional compute capacity while consuming the storage provided by the hyperconverged nodes.
Compute node	Provides centralized management and events end-point for vCenter.
Management Virtual Controller	Integrates with VMware Distributed Resources Scheduler to ensure optimal placement of the VM compute resources.
Intelligent Workload Optimizer	Facilitates communication between nodes and resolves state conflicts to ensure service continuity.

**QUESTION 4****DRAG DROP**

After HPE Superdome Flex deployment and nPar setup, you need to verify health status of HPE Superdome Flex components.

Put the steps on the left into the coned order on the right to perform this task.

Select and Place:

Enter show health command.
Confirm health status.
Open SSH client.
Open session to RMC.

1
2
3
4

Correct Answer:

1	Open SSH client.
2	Open session to RMC.
3	Enter show health command.
4	Confirm health status.

**QUESTION 5**

## HOTSPOT

Your customer is implementing an HPE Synergy solution based on three frames.

Click each of the ports that can be used to connect satellite modules.

Hot Area:

Correct Answer:
