QUESTION 1

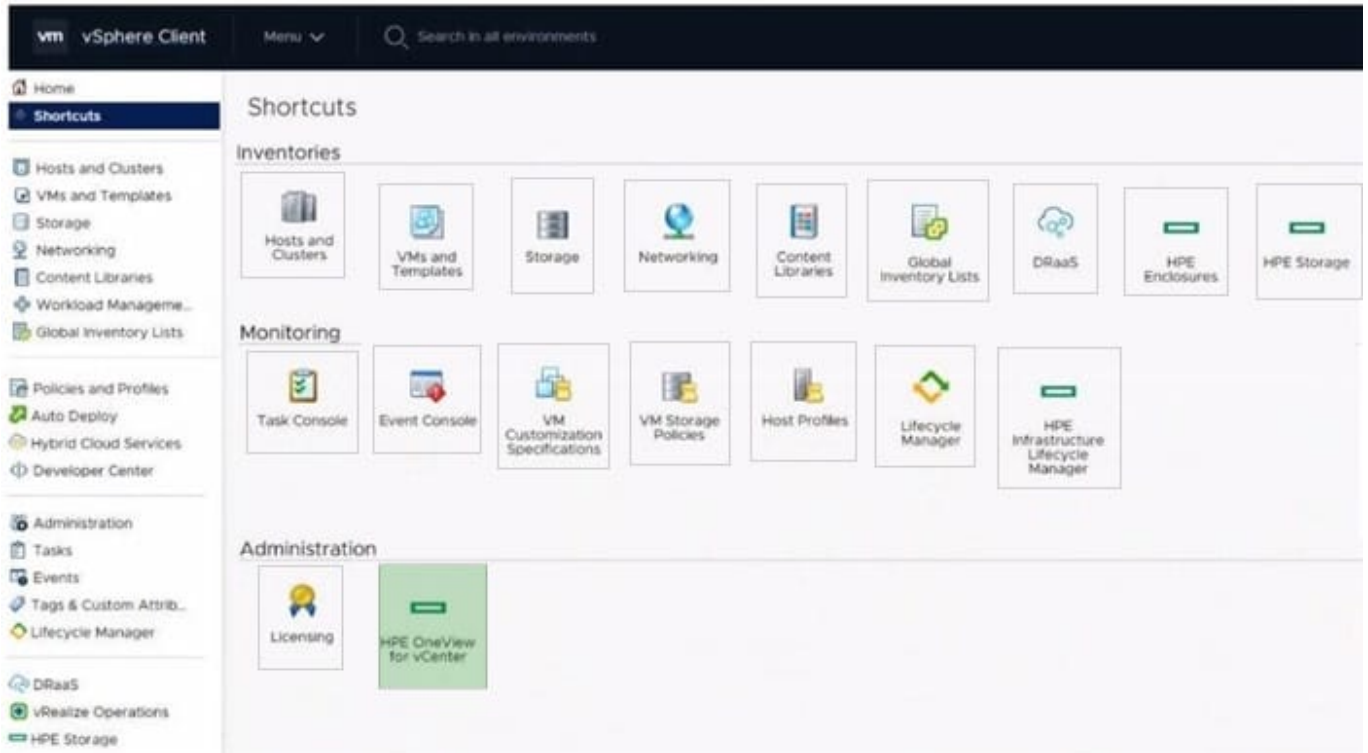

HOTSPOT

Click the option that will allow you to change the ESXI image used In an OS Deployment Plan.

Hot Area:

Correct Answer:

QUESTION 2

DRAG DROP

Your customer plans to use HPE OneView for VMware vCenter Server to deploy ESXi systems. They created a server profile template that they want to use in HPE OneView.

Put the steps required to configure HPE OneView for VMware vCenter Server on the left into their correct order on the right.

Select and Place:

Steps	Answer Area
Add HPE OneView credentials to the vCenter Server and create OS Deployment Plan.	
Add vCenter Server to HPE OneView for VMware vCenter Server.	
Deploy new ESXi systems using vCenter Server interface.	
Upload HPE-friendly ESXi image.	

Correct Answer:

Steps

Answer Area

- Add vCenter Server to HPE OneView for VMware vCenter Server.
- Add HPE OneView credentials to the vCenter Server and create OS Deployment Plan.
- Upload HPE-friendly ESXi image.
- Deploy new ESXi systems using vCenter Server interface.

QUESTION 3

DRAG DROP

Match each HPE Synergy logical component with the definition.

Select and Place:

Component

Enclosure group

Logical enclosure

Logical interconnect

Logical interconnect group

Definition

Acts as a recipe for creating a group that represents the available networks, uplink sets, and interconnect settings for a set of physical interconnects in a set of enclosures.

A single administrative entity that consists of the configuration for a set of interconnects in a single enclosure or a frame link topology.

A logical resource that defines a consistent configuration for an enclosure or a set of enclosures making up a logical enclosure.

Contains the configuration intended for a set of physical enclosures.

Correct Answer:

Component

Logical interconnect group

Logical interconnect

Enclosure group

Logical enclosure

Definition

Acts as a recipe for creating a group that represents the available networks, uplink sets, and interconnect settings for a set of physical interconnects in a set of enclosures.

A single administrative entity that consists of the configuration for a set of interconnects in a single enclosure or a frame link topology.

A logical resource that defines a consistent configuration for an enclosure or a set of enclosures making up a logical enclosure.

Contains the configuration intended for a set of physical enclosures.

QUESTION 4

HOTSPOT

Click the drop-down menu that will allow you to define the location of the master modules within the logical interconnect group.

Hot Area:

Create Logical Interconnect Group

General ▾ ?

General

Name

Logical Interconnect Group

Using the selectors below, describe the logical interconnect group to be created and then click "Select interconnects" to see the bay and interconnect choices.

Interconnect type

Enclosure count

Interconnect bay set

Redundancy

Downlink speed

Select interconnects

Correct Answer:

Create Logical Interconnect Group
General ▾
?

General

Name

Logical Interconnect Group

Using the selectors below, describe the logical interconnect group to be created and then click "Select interconnects" to see the bay and interconnect choices.

Interconnect type

Enclosure count

Interconnect bay set

Redundancy

Downlink speed

QUESTION 5

DRAG DROP

Match HPE SimpliVity term with the definition.

Select and Place:

Term		Definition
Arbiter		Non-hyperconverged servers that can exist in an HPE SimpliVity environment and provide additional compute capacity while consuming the storage provided by the hyperconverged nodes.
Compute node		Provides centralized management and events end-point for vCenter.
Management Virtual Controller		Integrates with VMware Distributed Resources Scheduler to ensure optimal placement of the VM compute resources.
Intelligent Workload Optimizer		Facilitates communication between nodes and resolves state conflicts to ensure service continuity.

Correct Answer:

Term	Definition
	Arbiter
	Compute node
	Management Virtual Controller
	Intelligent Workload Optimizer

Arbiter
Non-hyperconverged servers that can exist in an HPE SimpliVity environment and provide additional compute capacity while consuming the storage provided by the hyperconverged nodes.

Compute node
Provides centralized management and events end-point for vCenter.

Management Virtual Controller
Integrates with VMware Distributed Resources Scheduler to ensure optimal placement of the VM compute resources.

Intelligent Workload Optimizer
Facilitates communication between nodes and resolves state conflicts to ensure service continuity.
