QUESTION 1

DRAG DROP

Put the steps of the HPE infosight flow in the correct order.

Select and Place:

The interface shows a list of steps on the left: Observing, Learning, Recommending, Predicting, and Acting. On the right, there are five numbered slots in the 'Answer Area' for placing the steps in the correct order. Navigation arrows are visible on the right side of the interface.

Correct Answer:

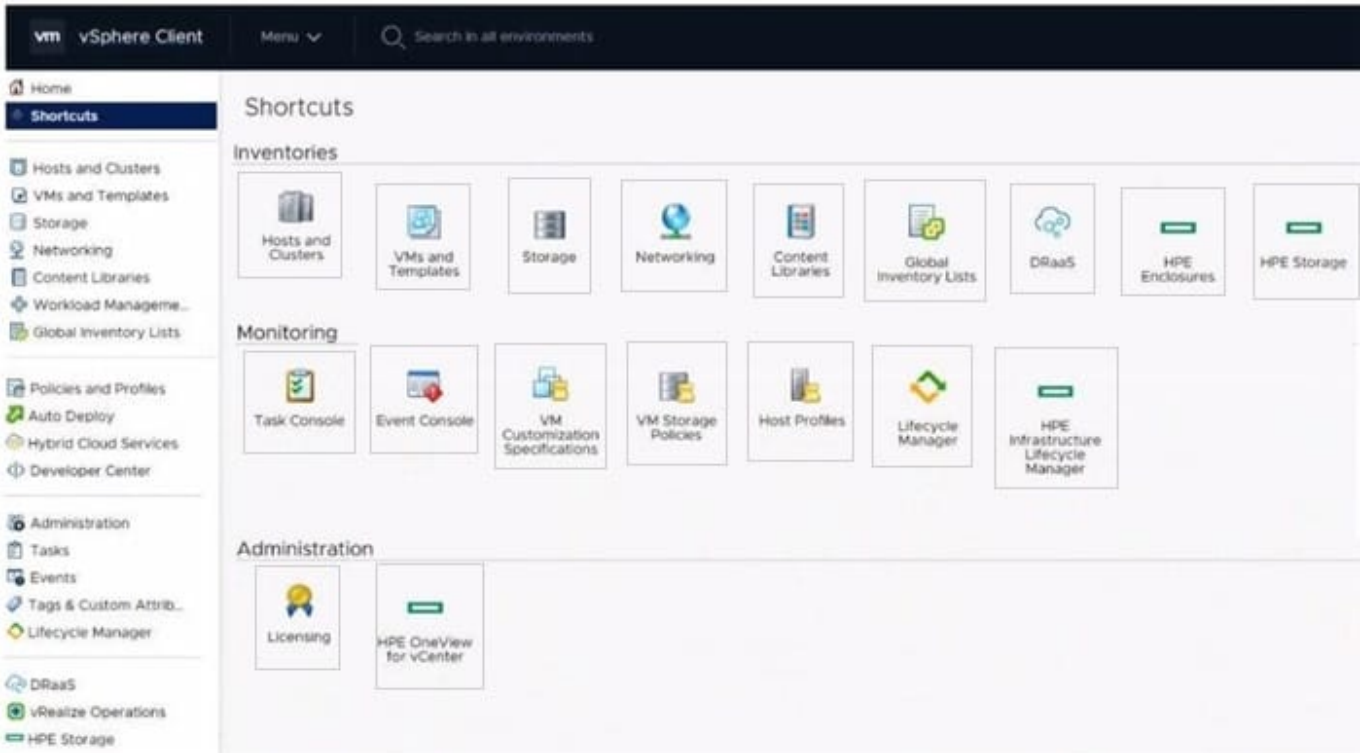

The correct answer shows the steps in the following order: 1 Observing, 2 Learning, 3 Predicting, 4 Recommending, and 5 Acting. The 'Steps' area on the left is empty, and the 'Answer Area' on the right contains the steps in the correct order. Navigation arrows are visible on the right side of the interface.

QUESTION 2

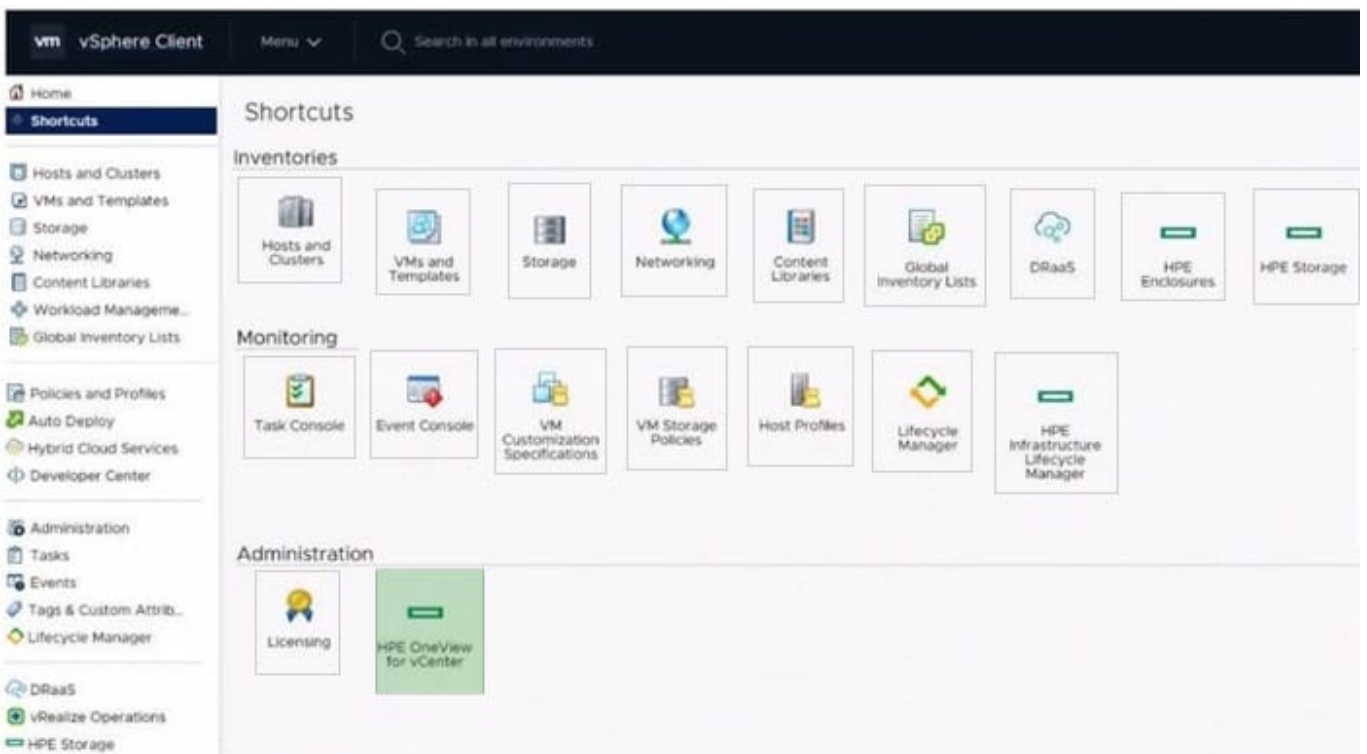

HOTSPOT

Click the option that will allow you to change the ESXI image used In an OS Deployment Plan.

Hot Area:

Correct Answer:

QUESTION 3

HOTSPOT

An HPE Synergy customer needs to prevent a timeout and loss of communication during an external switch firmware upgrade.

Click the parameter that the customer should configure within an uplink set to meet this requirement.

Hot Area:

Create Uplink Set ?

General

Name	<input type="text" value="Prod-US"/>
Consistency checking	<input type="text" value="Exact match"/>
Type	<input type="text" value="Ethernet"/>
Connection mode	Automatic
LACP timer	<input type="text" value="Short (1s)"/>
LACP load balancing	<input type="text" value="Source & Destination MAC Address"/>
LACP failover trigger	<input type="text" value="All active uplinks transition to offline"/>
LACP distribute uplink ports	<input checked="" type="checkbox"/>

Correct Answer:

Create Uplink Set ?

General

Name	<input type="text" value="Prod-US"/>
Consistency checking	<input type="text" value="Exact match"/>
Type	<input type="text" value="Ethernet"/>
Connection mode	Automatic
LACP timer	<input type="text" value="Short (1s)"/>

iLO Hostname	ILOCZ204400X0.wsw.edunet.hpe.com
iLO Dedicated Network Port	Enabled

QUESTION 5

DRAG DROP

Match each HPE Synergy logical component with the definition.

Select and Place:

Component		Definition
Enclosure group		Acts as a recipe for creating a group that represents the available networks, uplink sets, and interconnect settings for a set of physical interconnects in a set of enclosures.
Logical enclosure		A single administrative entity that consists of the configuration for a set of interconnects in a single enclosure or a frame link topology.
Logical interconnect		A logical resource that defines a consistent configuration for an enclosure or a set of enclosures making up a logical enclosure.
Logical interconnect group		Contains the configuration intended for a set of physical enclosures.

Correct Answer:

Component		Definition
	Logical interconnect group	Acts as a recipe for creating a group that represents the available networks, uplink sets, and interconnect settings for a set of physical interconnects in a set of enclosures.
	Logical interconnect	A single administrative entity that consists of the configuration for a set of interconnects in a single enclosure or a frame link topology.
	Enclosure group	A logical resource that defines a consistent configuration for an enclosure or a set of enclosures making up a logical enclosure.
	Logical enclosure	Contains the configuration intended for a set of physical enclosures.
