QUESTION 1

DRAG DROP

List in the correct order what the system will do when you perform a handover action.

Select and Place:

ACTION

| Brings the newly replicated volumes online. |
| Replicates these snapshots to a downstream replication partner. |
| Reverses replication roles/direction. |
| Takes a snapshot of all associated volumes. |
| Takes all associated volumes offline. |
| Transfers ownership of the volume collection to the partner. |

ORDER

Correct Answer:

ACTION

ORDER

| Takes all associated volumes offline. |
| Takes a snapshot of all associated volumes. |
| Replicates these snapshots to a downstream replication partner. |
| Transfers ownership of the volume collection to the partner. |
| Brings the newly replicated volumes online. |
| Reverses replication roles/direction. |

QUESTION 2

Which technology is utilized by AF-Series deduplication?

A. XORing

B. block-by-block compare

C. MD5 hashing

D. SHA2-256 encryption

Correct Answer: D

QUESTION 3

How is SmartReplicate licensed?

A. per array

B. free of charge

C. per target

D. based on capacity (per 1TB)

Correct Answer: B

QUESTION 4

How can controller failover be performed? (Choose two.)

A. In CLI, use the command: failover.Perform it online via InfoSight.

B. In WebUI, on the array level, click MAKE ACTIVE.

C. In OCP, press the Failover button.

D. Perform it online via InfoSight.

Correct Answer: AB

QUESTION 5

DRAG DROP

Match the event log severity levels to their descriptions.

Select and Place:

SEVERITY		DESCRIPTION
All		An event has occurred that does not require action to be taken and does not affect system performance. This level of event is useful for troubleshooting or for determining system trends.
Critical		An event has occurred that might impact system performance. Action will likely be necessary, but no damage will occur if the action is not taken immediately.
Info		An event has occurred that requires immediate attention. Data loss or hardware damage may occur if action is not taken quickly.It also triggers email notification, defined on the ADMINISTRATION tab.
Warning		Events are shown regardless of severity. Manual intervention may or may not be needed.

Correct Answer:

SEVERITY		DESCRIPTION
	Info	An event has occurred that does not require action to be taken and does not affect system performance. This level of event is useful for troubleshooting or for determining system trends.
	Warning	An event has occurred that might impact system performance. Action will likely be necessary, but no damage will occur if the action is not taken immediately.
	Critical	An event has occurred that requires immediate attention. Data loss or hardware damage may occur if action is not taken quickly.It also triggers email notification, defined on the ADMINISTRATION tab.
	All	Events are shown regardless of severity. Manual intervention may or may not be needed.
