QUESTION 1

DRAG DROP

Match the security features of HPE OneView with their use cases.

Select and Place:

Feature	Use Case	
Certificate based trust	Identity validation for management network transactions.	
Role based access control	Secure form of user authentication based on "what you know" and "what you have".	
Scope based access control	Restriction of user rights to a subset of resources within the infrastructure.	
Two-factor authentication	Restriction of user rights to perform actions (create, read, update, delete, or use) to specific resources within a category.	

Correct Answer:

Feature	Use Case	
	Identity validation for management network transactions.	Certificate based trust
	Secure form of user authentication based on "what you know" and "what you have".	Two-factor authentication
	Restriction of user rights to a subset of resources within the infrastructure.	Scope based access control
	Restriction of user rights to perform actions (create, read, update, delete, or use) to specific resources within a category.	Role based access control
