QUESTION 1

You configured downlink aggregation for one of the HPE Synergy Compute Modules in an environment by placing two connections in the same Link Aggregation Group. After you made the changes to the server profile, its status changed to critical.

What can be done to fix this issue?

A. The teaming or bonding driver in the server OS must be configured to enable the LACP and to form the LAG correctly.

B. The server profile for a given HPE Synergy compute module should be reapplied, then the Compute Module should be rebooted.

C. Link Aggregation Group functionality should be enabled in advanced properties of the Logical Interconnect.

D. Ensure that the Link Aggregation Group time-out value matches the server set values.

Correct Answer: C

QUESTION 2

You want to add the latest IL0 firmware to an HPE OneView firmware repository. How can you complete this task?

A. A PowerShell script must be used to upload IL0 firmware to the Internal or external firmware repository.

B. A custom SPP iso Image must be created with the new IL0 firmware version and uploaded to the repository.

C. An external repository must be created, because standalone components are supported only In an external repository.

D. ILO firmware can be marked as a hotnx and uploaded directly to the Internal or external firmware repository.

Correct Answer: B

QUESTION 3

Which statement about M-LAG setup is true?

A. When combined with IRF, M-LAG will allow you to aggregate ports coming from clustered HPE Synergy Virtual Connect modules.

B. M-LAG for HPE Synergy can be either single-homed or multi-homed, while for HPE BladeSystem only single-homed.

C. sFLOW cannot be enabled if M-LAG is configured between HPE Synergy Virtual Connect modules in the same frame.

D. M-LAG has to be defined manually for HPE BladeSystem, but it is automatically configured for HPE Synergy.

Correct Answer: A

QUESTION 4

You are deploying HPE OneView to manage a customer\\'s HPE ProLiant servers

Is this statement about appliance availability true?

A. HA features for HPE OneView are enabled only if the appliance is deployed on an HPE SimpliVity cluster

B. HPE OneView has a built-in HA feature that can be activated with an additional license

C. HPE OneView availability relies on HA features provoed by the hypervisor

D. During hpe oneView deployment customer may select configure proprietary HA mode.

Correct Answer: C

QUESTION 5

Your customer wants to use HPE OneView for VMware vCenter Server to simplify management of their VMware cluster running on HPE Synergy. The customer is concerned with the cost of additional licenses.

How will you explain licensing rules for this product?

A. As long as the customer has HPE OneVtew Global Dashboard deployed, HPE OneView for VMware vCenter Server does not require any additional licenses.

B. One HPE OneView for VMware vCenter Server license is required per HPE Synergy frame if more than 10 Compute Modules are installed in the frame.

C. If the number of the HPE Synergy Compute Modules installed in HPE Synergy frame is less than 10, no license is required to use HPE OneView tor VMware vCenter Server.

D. As long as the server is managed using HPE OneView. the customer can use HPE OneView for VMware vCenter Server without additional licenses.

Correct Answer: B
