**QUESTION 1**

Your company has found some suspicious conversations for some internal users. The security team suspects those users are communicating with entities in other countries. You have been assigned the task of identifying those users who are either uploading or downloading files from servers in other countries. Is this the best way to visualize conversations of suspected users in this scenario? (Visualizing Applications and Ports.)

A. Yes

B. No

Correct Answer: A

QUESTION 2

While discussing network security with an associate, the associate asks why a company would need internal monitoring when they have firewalls and Wireless Intrusion Protection configured. Is this an appropriate response? (You point out that while these security measures are required, there are other attack vectors in a network that are simply not protected by these.)

A. Yes

B. No

Correct Answer: A

QUESTION 3

While a customer site you are asked to explain the advantages and limits of collecting AMON from the Aruba Mobility Controllers. Would this be a correct statement? (AMON is an easy way to monitor a network where the primary access method is through Aruba Mobility Controllers.)

A. Yes

B. No

Correct Answer: A

QUESTION 4

Refer to the exhibit.

bytes_received	7.67 KB
bytes_sent	2.17 KB
bytes_total	9.84 KB
conversation_id	5ec21866cd800000000001e84805b8188e701000026
data_subtype	Amon
data_type	Logs
