**QUESTION 1**

Which is one way that aruba instant on devices offer security tailored to the needs of your target customers.

- A. They contact central aruba to receive centrally defined security policies to protect wired and wireless access
- B. They support dynamic segmentation so they can offload security enforcement to aruba gateways
- C. They automatically update their software to ensure they stay safe without extra customer attention.
- D. They integrate with aruba Clearpass and enforce granular, user-based policies for micro-segmentation

Correct Answer: A

---

**QUESTION 2**

You have proposed an Aruba wireless solution to a hospital with very high availability requirements for the wireless network. Which feature of Aruba solutions should you explain provides seamless failover and live upgrades for mobility controllers?

- A. live mobility tracking with Aruba Meridian
- B. connectivity Health in AirWave or Central
- C. clustering with ArubaOS 8.x and above
- D. AirMatch and ClientMatch with Mobility Master (MM)

Correct Answer: C

---

**QUESTION 3**

A customer complains about the complexity of wired network architectures? What should you explain about ArubaOS switches?

- A. Network Analytics Engine (NAE) analyzes network traffic patterns and automatically reconfigures the network architecture in order to optimize traffic flows.
- B. ArubaOS switches deliver the high performance and features that enterprise customers need combined with the simplicity of an unmanaged switch that requires zero configuration.
- C. Dynamic segmentation divides the wired network architecture into three logical tiers, making it simpler to deploy the switches with less work on the part of managers.
- D. Aruba switches bring performance, security and operational simplicity to enterprise networks with innovations like Segmentation and Aruba Network Analytics Engine.

Correct Answer: D

---

#### QUESTION 4

What is one way that an Aruba SD-WAN solution transforms a company's WAN?

- A. It requires all traffic to pass through security appliances in the data center before exiting to the Internet.
- B. It enables the company to use a mix of MPLS, Internet, and LIE uplinks to connect branches to the data center.
- C. It replaces expensive appliances for providing WAN uplinks with WAN software that runs on Aruba CX switches.
- D. It increases specialization for branch equipment, so that a single appliance is no longer expected to handle security and connectivity.

Correct Answer: B

---

#### QUESTION 5

You are beginning a conversation about Aruba ESP with a customer. You ask about the size of the IT team and the tasks on which the team spends its time. What goal should you be trying to achieve with this question?

- A. Explaining to the customer why the company needs to expand its IT team to stay competitive
- B. Revealing that the IT team lacks expertise and presents a good opportunity for you to upsell Aruba Training Solutions
- C. Determining whether the customer has a large enough IT team to be able to succeed with a complex enterprise solution like ESP
- D. Discussing with the customer how IT could achieve more if resources were freed up by Aruba Central

Correct Answer: A
