**QUESTION 1**

What is the purpose of Operator Profiles?

- A. to enforce role based access control for Aruba Controllers
- B. to enforce role based access control for ClearPass Policy Manager admin users
- C. to enforce role based access control for ClearPass Guest Admin users
- D. to assign ClearPass roles to guest users
- E. to map AD attributes to admin privilege levels in ClearPass Guest

Correct Answer: C

An operator profile determines what actions an operator is permitted to take when using ClearPass Guest.

### QUESTION 3

Use this form to make changes to the RADIUS Web Login Guest Network.

Section	Configuration
Authentication:	<b>Credentials - Require a username and password</b> Select the authentication requirement. Access Code requires a single code (username) to be entered. Anonymous allows a blank form requiring just the terms or a Log In button. A pre-Access Code and Anonymous require the account to have the Username Authentici
Custom Form:	<input type="checkbox"/> Provide a custom login form If selected, you must supply your own HTML login form in the Header or Footer HT
Custom Labels:	<input type="checkbox"/> Override the default labels and error messages If selected, you will be able to alter labels and error messages for the current login
* Pre-Auth Check:	<b>RADIUS - check using a RADIUS request</b> Select how the username and password should be checked before proceeding to th
Terms:	<input type="checkbox"/> Require a Terms and Conditions confirmation If checked, the user will be forced to accept a Terms and Conditions checkbox.

A Web Login page is configured in Clear Pass Guest as shown.

What is the purpose of the Pre-Auth Check?

- A. To authenticate users after the NAD sends an authentication request to ClearPass
- B. To authenticate users before the client sends the credentials to the NAD
- C. To authenticate users when they are roaming from one NAD to another
- D. To authenticate users before they launch the Web Login Page
- E. To replace the need for the NAD to send an authentication request to ClearPass

Correct Answer: B

### QUESTION 4

Refer to the exhibit.

**Services - Corp User Authentication with MAC Caching**

Summary Service Authentication **Authorization** Roles Enforcement

Authorization Details:

Authorization sources from which role mapping attributes are fetched

**Authentication Source**

1. [Guest User Repository] [Local SQL DB]

Additional authorization sources from which to fetch role-mapping

[Endpoints Repository] [Local SQL DB] Remove  
[Time Source] [Local SQL DB] View Details  
Modify

-- Select to Add --

Based on the information shown, what is the purpose of using [Time Source] for authorization?

- A. to check whether the MAC address status is unknown in the endpoints table
- B. to check whether the MAC address is in the MAC Caching repository
- C. to check how long it has been since the last web login authentication
- D. to check whether the MAC address status is known in the endpoint table.

Correct Answer: D

## QUESTION 5

A university wants to deploy ClearPass with the Guest module. The university has two types that need to use web login authentication. The first type of users are students whose accounts are in an Active Directory server. The second type of users are friends of students who need to self-register to access the network.

How should the service be set up in the Policy Manager for this network?

- A. Guest User Repository and Active Directory server both as authentication sources
- B. Active Directory server as the authentication source, and Guest User Repository as the authorization source
- C. Guest User Repository as the authentication source, and Guest User Repository and Active Directory server as authorization sources
- D. either the Guest User Repository or Active Directory server should be the single authentication source
- E. Guest User Repository as the authentication source and the Active Directory server as the authorization source

Correct Answer: A
