QUESTION 1

A customer uses a Meridian-powered app to get directions from one location to another in a venue. The customer does not see a blue dot on the map to indicate the location or the device.

Which method will be used to provide directions?

A. location-enabled app

B. USB beacon

C. battery-powered beacon

D. self-guided wayfinding

Correct Answer: A

QUESTION 2

What is the minimum battery life of an Aruba battery-powered beacon?

A. 1 month

B. 6 months

C. 1 year

D. 4 years

Correct Answer: D

QUESTION 3

An app developer wants to create a new campaign for a venue app. What is the first step the developer must take to create the campaign?

A. Click on the proximity beacon on the map and associate it to a campaign.

B. Create a title for the campaign in the Meridian Editor.

C. Configure a proximity beacon for the campaign with the Beacons App.

D. Create a name for the campaign with the Beacons App.

Correct Answer: B

QUESTION 4

A network engineer accesses the Meridian Editor and notices there is no access to pages, events, and themes. The

engineer can access maps, placemarks, and notifications.

What could be the reason?

A. The pages, events, and themes are not enabled for the app.

B. The app is a location-based app.

C. The app is an SDK app.

D. The Meridian Editor needs the license installed.

Correct Answer: D

QUESTION 5

An app developer wants a campaign to trigger and send a notification to a device only during certain times of the day. To configure this, where should the developer set the schedule for the campaign?

A. in the mobile device profile

B. in the Beacons App

C. in the Meridian Editor

D. in the venue app

Correct Answer: C
