**QUESTION 1**

You are integrating a Postgres SQL server with the ClearPass Policy Manager. What steps will you follow to complete the integration process? (Select three)

- A. Click on the default filter name with pre-defined filter queries and check box to enable as role.
- B. Specify a new filter with filter queries to fetch authentication and authorization attributes.
- C. Attribute Name under filter configuration must match one of the columns being requested from the database table.
- D. Create a new Endpoint context server and add the SQL server IP, credentials and the database name.
- E. Alias Name under filter configuration must match one of the columns being requested from the database table.
- F. Create a new authentication source and add the SQL server IP, credentials and the database name.

Correct Answer: BDF

QUESTION 2

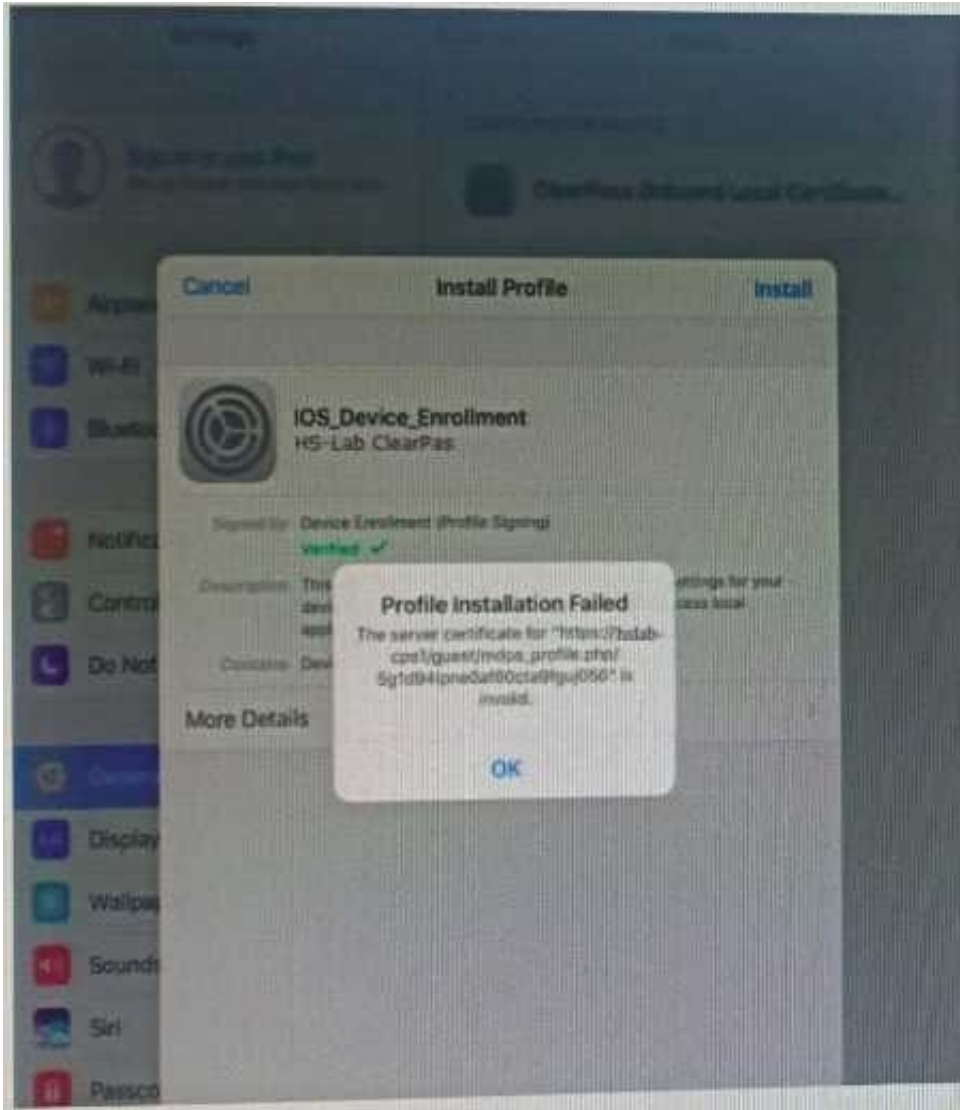

You are deploying ClearPass Policy Manager with Guest functionality for a customer with multiple Aruba Networks Mobility Controllers. The customer wants to avoid SSL errors during guest access but due to company security policy cannot use a wildcard certificate on ClearPass or the Controllers. What is the most efficient way to configure the customer's guest solution? (Select two.)

- A. Build multiple Web Login pages with vendor settings configured for each controller
- B. Install the same public certificate on all Controllers with the common name "controller {company domain}"
- C. Build one Web Login page with vendor settings for controller {company domain}
- D. Install multiple public certificates with a different Common Name on each controller

Correct Answer: AB

QUESTION 3

Refer to the exhibit:

A customer has configured Onboard and Windows devices work as expected but cannot get the Apple iOS devices to Onboard successfully. Where would you look to troubleshoot the Issued (Select two)

- A. Check if the ClearPass HTTPS server certificate installed in the server is issued by a trusted commercial certificate authority.
- B. Check if the customer installed the internal PKI Root certificate presented by the ClearPass during the provisioning process.
- C. Check if a DNS entry is available for the ClearPass hostname in the certificate, resolvable from the DNS server assigned to the client.
- D. Check if the customer has Instated a custom HTTPS certificate for IDS and another internal PKI HTTPS certificate for other devices.
- E. Check if the customer has installed the same internal PKI signed RADIUS server certificate as the HTTPS server certificate.

Correct Answer: AC

**QUESTION 4**

While configuring a guest solution, the customer is requesting that guest user receive access for four hours from their first login. Which Guest Account Expiration would you select?

- A. expire_after
- B. do_expire
- C. expire_time
- D. expire_postlogin

Correct Answer: A

QUESTION 5

You have Integrated ClearPass Onboard with Active Directory Certificate Services (ADCS) web enrollment to sign the Anal device TLS certificates The Onboard provisioning process completes successfully but when the user finally clicks connect, the user falls to connect to the network with an unknown_ca certificate error. What steps will you follow to complete the requirement?

- A. Make sure that the ClearPass servers are using the default self-signed certificates for both SSL and RADIUS server identity
- B. Add the ADCS root certificate to both the CPPM Certificate trust list and to the Onboard Certificate Store trust list
- C. Make sure both the ClearPass servers have different certificates used for both SSL and RADIUS server identity.
- D. Export the self-signed certificate from the ClearPass servers and manually add them as trusted certificates in clients

Correct Answer: A
