QUESTION 1

Which are valid enforcement profile types? (Choose two.)

- A. ClearPass Entity Update Enforcement
- B. Aruba Script Enforcement
- C. Policy Service Enforcement
- D. RADIUS Change of Authorization (CoA)

Correct Answer: AD

QUESTION 2

Refer to the exhibit.

The screenshot shows the 'Authorization' tab in the ClearPass web interface. The 'Authorization Sources' section lists the following sources:

- 1. [Endpoints Repository] [Local SQL DB]
- [Time Source] [Local SQL DB]
- [Guest User Repository] [Local SQL DB]

A red box highlights the '[Time Source] [Local SQL DB]' entry, and a red arrow points to it from the 'Authorization Details' section on the left. The interface also includes buttons for 'Remove', 'View Details', and 'Modify' for each source, and a '--Select to Add--' dropdown at the bottom.

When creating a new ClearPass Service, the [Time Source] has been added as an authorization source. What time source is ClearPass referencing?

- A. the ClearPass server where Insight Master has been enabled
- B. the local clock of the ClearPass server doing the authentication
- C. the local time setting found on the authenticating client machine
- D. the NTP (Network Time Protocol) source indicated in the Cluster settings

Correct Answer: C

QUESTION 3

Which statement is true about OnGuard? (Choose two.)

- A. It is used to ensure that Antivirus/Antispyware programs are running
- B. It supports both Windows and Mac OS X clients
- C. It is used to identify and remove any malware/viruses
- D. It only supports 802.1X authentication

Correct Answer: AB

QUESTION 4

ClearPass receives fingerprinting profile data for a client device that is based on MAC OUI, NMAP, DHCP, and OnGuard. Which fingerprint or fingerprints are used?

- A. NMAP because it is actively obtained
- B. The last fingerprint gathered
- C. OnGuard because it is application based
- D. All fingerprints are applied

Correct Answer: A

QUESTION 5

What are "known" endpoints in ClearPass?

- A. "Known" endpoints have been fingerprinted to determine their operating system and manufacturer.
- B. These are endpoints whose beacons have been detected but have never completed authentication.
- C. The label "Known" indicates rogue endpoints labeled as "friendly" or "ignore".
- D. "Known" endpoints can be authenticated based on MAC address to bypass the captive portal login.

Correct Answer: D
