QUESTION 1

What are two storage resource management functions available in Hitachi Device Manager? (Choose two.)

- A. to determine optimum load balancing algorithms based on I/O profile
- B. to group storage resources for management purposes
- C. to schedule background microcode updates for storage system groups
- D. to search storage resources for outputting reports

Correct Answer: BD

QUESTION 2

You want to log in to Hitachi Device Manager (HDvM), but an Internal Server Error is displayed in the Web Client. You can ping the HDvM server, but no other operations can be performed. When troubleshooting, which two settings should you verify? (Choose two.)

- A. That the firewall is open for port 23015.
- B. That the HDvM's licensed capacity is sufficient.
- C. That Common Component services are running.
- D. That the memory heap size is sufficient.

Correct Answer: CD

QUESTION 3

A storage manager has recently implemented a Hitachi Device Manager environment and needs to assign users to the All Resources user group. From which two role options should the storage manager choose to create the user profiles? (Choose two.)

- A. UserGroup
- B. ViewGroup
- C. ModifyGroup
- D. CreateGroup

Correct Answer: BC

QUESTION 4

When configuring external storage on a VSP storage system, what happens when the Inflow Control option is set to

Enable?

- A. Writes will be rejected when the external volume cannot be accessed.
- B. Writes will be rejected when the cache usage is above threshold 1.
- C. Writes will be accepted when the external volume cannot be accessed.
- D. Writes will be rejected when the cache usage is above threshold 2.

Correct Answer: A

QUESTION 5

Using Hitachi Device Manager, a customer needs to see all required information on a display but the screen layout is difficult to read. They do not need to see the volume labels. What should the customer do?

- A. Access More Actions and choose Hide Labels.
- B. Access Column Settings and deselect Labels.
- C. Edit the ShowLabels parameter in the server.properties file and restart the HiCommandServer service.
- D. Ask for the user profile to be changed to disallow labels.

Correct Answer: B
