**QUESTION 1**

Which of the following functions is (are) counted for a development project FP count?

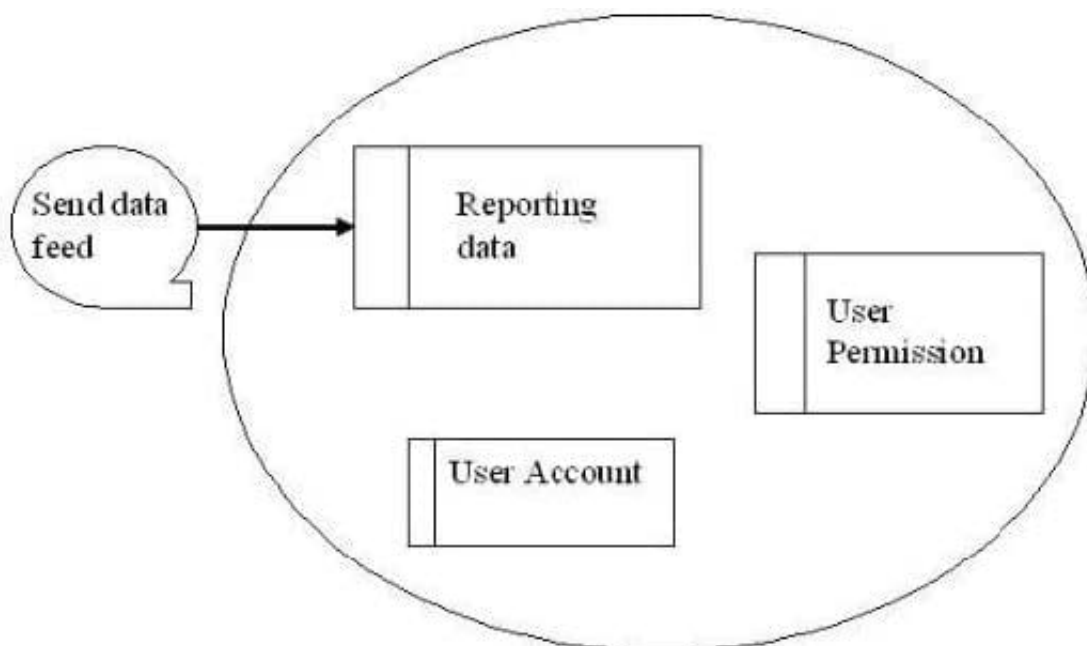

- A. Added functions
- B. Conversion functions
- C. Changed functions
- D. Both A and B

Correct Answer: D

---

**QUESTION 2**

The Report Generation application receives data from outside the boundary, and saves the data in the Reporting Data logical file, with additional processing logic involved. The user Information is maintained in the Report Generation application in the User Account logical file. How would the data functions be counted?

- A. One ILF and one EIF
- B. Two ILFs
- C. One ILF
- D. One ILF, one EIF and one EQ

Correct Answer: B

---

**QUESTION 3****TAX APPLICATION**

For the TAX application the user required the migration of existing taxpayer information (name, tax identification number, location name) to the TAX application. A conversion file with taxpayer data was created and imported into the Taxpayer logical file in the TAX application. The source of the data was the Account Holder logical file.

The user required the ability to Add, Change and Delete the taxpayer information in the Taxpayer logical file.

The user required the ability to View the taxpayer information prior to changing or deleting information.

From the Names of Possible Functions listed identify the base functional components for the TAX application baseline. Select N/A if a Name of Possible Functions does not apply.

Identify the functions used:
