QUESTION 1

Universal containers (UC) wants users to authenticate into their salesforce org using credentials stored in a custom
identity store. UC does not want to purchase or use a third- party Identity provider. Additionally, UC is extremely wary of
social media and does not consider it to be trust worthy. Which two options should an architect recommend to UC?
Choose 2 answers

A. Use a professional social media such as LinkedIn as an Authentication provider

B. Build a custom web page that uses the identity store and calls frontdoor.jsp

C. Build a custom Web service that is supported by Delegated Authentication.

D. Implement the Openid protocol and configure an Authentication provider

Correct Answer: CD

QUESTION 2

Universal Containers (UC) has Active Directory (AD) as their enterprise identity store and would like to use it for
Salesforce user authentication. UC expects to synchronize user data between Salesforce and AD and Assign the
appropriate Profile and Permission Sets based on AD group membership. What would be the optimal way to implement
SSO?

A. Use Active Directory with Reverse Proxy as the Identity Provider.

B. Use Microsoft Access control Service as the Authentication provider.

C. Use Active Directory Federation Service (ADFS) as the Identity Provider.

D. Use Salesforce Identity Connect as the Identity Provider.

Correct Answer: D

QUESTION 3

Which three are capabilities of SAML-based Federated authentication? Choose 3 answers

A. Trust relationships between Identity Provider and Service Provider are required.

B. SAML tokens can be in XML or JSON format and can be used interchangeably.

C. Web applications with no passwords are more secure and stronger against attacks.

D. Access tokens are used to access resources on the server once the user is authenticated.

E. Centralized federation provides single point of access, control and auditing.

Correct Answer: ADE

QUESTION 4

A multinational industrial products manufacturer is planning to implement Salesforce CRM to manage their business.
They have the following requirements:

1.

 They plan to implement Partner communities to provide access to their partner network .

2.

 They have operations in multiple countries and are planning to implement multiple Salesforce orgs.

3.

 Some of their partners do business in multiple countries and will need information from multiple Salesforce
communities.

4.

 They would like to provide a single login for their partners.

How should an Identity Architect solution this requirement with limited custom development?

A. Create a partner login for the country of their operation and use SAML federation to provide access to other orgs.

B. Consolidate Partner related information in a single org and provide access through Salesforce community.

C. Allow partners to choose the Salesforce org they need information from and use login flows to authenticate access.

D. Register partners in one org and access information from other orgs using APIs.

Correct Answer: A

QUESTION 5

A multinational company is looking to rollout Salesforce globally. The company has a Microsoft Active Directory
Federation Services (ADFS) implementation for the Americas, Europe and APAC. The company plans to have a single
org and they would like to have all of its users access Salesforce using the ADFS . The company would like to limit its
investments and prefer not to procure additional applications to satisfy the requirements.
