**QUESTION 1**

Which two things should be done to ensure end users can only use single sign-on (SSO) to login in to Salesforce?

Choose 2 answers

- A. Enable My Domain and select "Prevent login from https://login.salesforce.com".
- B. Request Salesforce Support to enable delegated authentication.
- C. Once SSO is enabled, users are only able to login using Salesforce credentials.
- D. Assign user "is Single Sign-on Enabled" permission via profile or permission set.

Correct Answer: AD

QUESTION 2

Containers (UC) uses an internal system for recruiting and would like to have the candidates' info available in the Salesforce automatically when they are selected. UC decides to use OAuth to connect to Salesforce from the recruiting system and would like to do the authentication using digital certificates. Which two OAuth flows should be considered to meet the requirement? Choose 2 answers

- A. JWT Bearer Token flow
- B. Refresh Token flow
- C. SAML Bearer Assertion flow
- D. Web Service flow

Correct Answer: AC

QUESTION 3

Universal Containers (UC) operates in Asia, Europe and North America regions. There is one Salesforce org for each region. UC is implementing Customer 360 in Salesforce and has procured External Identity and Customer Community licenses in all orgs.

Customers of UC use Community to track orders and create inquiries. Customers also tend to move across regions frequently.

What should an identity architect recommend to optimize license usage and reduce maintenance overhead?

- A. Merge three orgs into one instance of Salesforce. This will no longer require maintaining three separate copies of the same customer.
- B. Delete contact/ account records and deactivate user if user moves from a specific region; Sync will no longer be required.
- C. Contacts are required since Community access needs to be enabled. Maintenance is a necessary overhead that

must be handled via data integration.

D. Enable Contactless User in all orgs and downgrade users from Experience Cloud license to External Identity license once users have moved out of that region.

Correct Answer: C

QUESTION 4

A third-party app provider would like to have users provisioned via a service endpoint before users access their app from Salesforce. What should an identity architect recommend to configure the requirement with limited changes to the third-party app?

- A. Use a connected app with user provisioning flow.
- B. Create Canvas app in Salesforce for third-party app to provision users.
- C. Redirect users to the third-party app for registration.
- D. Use Salesforce identity with Security Assertion Markup Language (SAML) for provisioning users.

Correct Answer: A

QUESTION 5

Northern Trail Outfitters manages application functional permissions centrally as Active Directory groups. The CRM_SuperUser and CRM_Reportmg_SuperUser groups should respectively give the user the SuperUser and Reportmg_SuperUser permission set in Salesforce. Salesforce is the service provider to a Security Assertion Markup Language (SAML) identity provider.

How should an identity architect ensure the Active Directory groups are reflected correctly when a user accesses Salesforce?

- A. Use the Apex Just-in-Time handler to query standard SAML attributes and set permission sets.
- B. Use the Apex Just-in-Time handler to query custom SAML attributes and set permission sets.
- C. Use a login flow to query custom SAML attributes and set permission sets.
- D. Use a login flow to query standard SAML attributes and set permission sets.

Correct Answer: B
